Diffusion Processes and their Sample Paths Kiyosi Itô, Henry P. Jr. McKean, 2012-12-06 Since its first publication in 1965 in the series Grundlehren der mathematischen Wissenschaften this book has had a profound and enduring influence on research into the stochastic processes associated with diffusion phenomena Generations of mathematicians have appreciated the clarity of the descriptions given of one or more dimensional diffusion processes and the mathematical insight provided into Brownian motion Now with its republication in the Classics in Mathematics it is hoped that a new generation will be able to enjoy the classic text of It and McKean Diffusion Processes and Their Sample Paths K. Handbook of Dynamics and Probability Peter Müller, 2021-11-20 Our time is characterized by an explosive growth in the use of ever more complicated and sophisticated computer models These models rely on dynamical systems theory for the interpretation of their results and on probability theory for the quantification of their uncertainties A conscientious and intelligent use of these models requires that both these theories are properly understood This book is to provide such understanding It gives a unifying treatment of dynamical systems theory and probability theory It covers the basic concepts and statements of these theories their interrelations and their applications to scientific reasoning and physics The book stresses the underlying concepts and mathematical structures but is written in a simple and illuminating manner without sacrificing too much mathematical rigor The book is aimed at students post docs and researchers in the applied sciences who aspire to better understand the conceptual and mathematical underpinnings of the models that they use Despite the peculiarities of any applied science dynamics and probability are the common and indispensable tools in any modeling effort The book is self contained with many technical aspects covered in appendices but does require some basic knowledge in analysis linear algebra and physics Peter Müller now a professor emeritus at the University of Hawaii has worked extensively on ocean and climate models and the foundations of complex system theories *Stochastic Processes for Insurance and Finance* Tomasz Rolski, Hanspeter Schmidli, V. Schmidt, Jozef L. Teugels, 2009-09-25 Stochastic Processes for Insurance and

Finance offers a thorough yet accessible reference for researchers and practitioners of insurance mathematics Building on recent and rapid developments in applied probability the authors describe in general terms models based on Markov processes martingales and various types of point processes Discussing frequently asked insurance questions the authors present a coherent overview of the subject and specifically address The principal concepts from insurance and finance Practical examples with real life data Numerical and algorithmic procedures essential for modern insurance practices Assuming competence in probability calculus this book will provide a fairly rigorous treatment of insurance risk theory recommended for researchers and students interested in applied probability as well as practitioners of actuarial sciences Wiley Series in Probability and Statistics **Handbook of Feynman Path Integrals** Christian Grosche, Frank Steiner, 1998-06-22 The Handbook of Feynman Path Integrals appears just fifty years after Richard Feynman published his pioneering paper in 1948 entitled Space Time Approach to Non Relativistic Quantum Mechanics in which he introduced his new formulation of quantum mechanics in terms of path integrals The book presents for the first time a comprehensive table of Feynman path integrals together with an extensive list of references it will serve the reader as a thorough introduction to the theory of path integrals As a reference book it is unique in its scope and will be essential for many physicists chemists and mathematicians working in different areas of research **Technical Report Series of the Laboratory for Research in Statistics and Probability** ,1991 **Annales de L'I.H.P.** ,2004 **Nagoya Mathematical Journal** ,1998 *Journal of the American Statistical Association* American Statistical Association,1999 **A New Approach to Local Times** Martin L.
