Shen, Simon See, Wentong Cai, Pingzhi Fan, Susumu Horiguchi, 2004-12-07 The 2004 International Conference on Parallel and Distributed Computing Applications and Technologies PDCAT 2004 was the fifth annual conference and was held at the Marina Mandarin Hotel Singapore on December 8-10, 2004. Since the inaugural PDCAT held in Hong Kong in 2000, the conference has become a major forum for scientists, engineers, and practitioners throughout the world to present the latest research results, ideas, developments, techniques, and applications in all areas of parallel and distributed computing. The technical program was comprehensive and featured keynote speeches, technical paper presentations, and exhibitions showcased by industry vendors. The technical program committee was overwhelmed with submissions of papers for presentation from countries worldwide. We received 242 papers and after viewing them based on stringent selection criteria, we accepted 173 papers. The papers in the proceedings focus on parallel and distributed computing, viewed from the three perspectives of networking and architectures, software systems and technologies, and algorithms and applications. We acknowledge the great contribution from all of our local and international committee members and reviewers who devoted their time in the review process and provided valuable feedback for the authors. PDCAT 2004 could never have been successful without the support and assistance of several institutions and many people. We sincerely appreciate the support from the National Grid Office and IEEE Singapore for technical co-sponsorship. The financial sponsorships from the industrial sponsors Hewlett Packard Singapore, IBM Singapore, Sun Microsystems, SANDZ Solutions, Silicon Graphics, and Advanced Digital Information Corporation are gratefully acknowledged.

Cloud Computing Technologies Mr. M. Arul Sankar, Dr. D. Selvapandian, Mr. Abdul Khalid, Ms. Aarushi Thusu, 2025-07-17 Cloud Computing Technologies is a well-structured and authoritative guide that unravels the dynamic world of cloud-based solutions and the technological advancements driving digital transformation. Designed to serve as a valuable resource for students, educators, IT professionals, and researchers, this book delves into the core concepts and practical implementations of cloud computing. It begins by laying a strong foundation in the principles of parallel and distributed systems, virtualization, and the evolution of cloud architectures. Readers are introduced to key topics such as service models (IaaS, PaaS, SaaS), deployment models (public, private, hybrid, community), cloud storage, elastic resource management, and cloud-enabling technologies like virtualization, SOA, and publish-subscribe systems. The book explores modern cloud architecture, layered design, and NIST standards while highlighting the importance of security, data privacy, and risk management in cloud environments. Detailed coverage of multi-tenancy, scalability, on-demand provisioning, and disaster recovery provides insights into real-world applications and operational strategies. With a blend of theoretical knowledge and hands-on context, the book incorporates lab-ready content, implementation mechanisms, and deployment practices. Advanced topics such as IoT integration, high-throughput computing, server virtualization, and parallel computing models offer a comprehensive understanding of cloud's impact across domains. Cloud Computing Technologies also addresses contemporary challenges such as vendor lock-in, interoperability, and security.
