

# Differentiation from first principles

Practice using general formula  
Find the gradient function for  
 $f(x) = 20x^2 + 2x$ , from first principles.

$$f(x) = 20x^2 + 2x$$

$$f(x+h) =$$

$$f(x) = 20x^2 + 2x$$

$$f(x+h) = 20(x+h)^2 + 2(x+h)$$

$$f(x+h) = 20(x+h)(x+h) + (2x+2h)$$

$$f(x+h) = 20(x^2 + 2xh + h^2) + 2x + 2h$$

$$f(x+h) = 20x^2 + 40xh + 20h^2 + 2x + 2h$$

$$f(x+h) = 20x^2 + 40xh + 20h^2 + 2x + 2h$$

$$f'(x) = \lim_{h \rightarrow 0} \frac{f(x+h) - f(x)}{h}, \quad h \neq 0$$

$$f'(x) = \lim_{h \rightarrow 0} \frac{(20x^2 + 40xh + 20h^2 + 2x + 2h) - (20x^2 + 2x)}{h}$$

$$f'(x) = \lim_{h \rightarrow 0} \frac{40xh + 20h^2 + 2h}{h}$$

$$f'(x) = \lim_{h \rightarrow 0} 40x + 20h + 2$$

$$\therefore f'(x) = 40x + 2$$

Burchard de Volder and the Age of the Scientific Revolution Andrea Strazzoni,2019-11-18 This monograph details the entire scientific thought of an influential natural philosopher whose contributions unfortunately have become obscured by the pages of history Readers will discover an important thinker Burchard de Volder He was instrumental in founding the first experimental cabinet at a European University in 1675 The author goes beyond the familiar image of De Volder as a forerunner of Newtonianism in Continental Europe He consults neglected materials including handwritten sources and takes into account new historiographical categories His investigation maps the thought of an author who did not sit with an univocal philosophical school but critically dealt with all the major philosophers and scientists of his age from Descartes to Newton via Spinoza Boyle Huygens Bernoulli

and Leibniz It explores the way De Volder s un systematic thought used rejected and re shaped their theories and approaches In addition the title includes transcriptions of De Volder s teaching materials disputations dictations and notes Insightful analysis combined with a trove of primary source material will help readers gain a new perspective on a thinker so far mostly ignored by scholars They will find a thoughtful figure who engaged with early modern science and developed a place that fostered experimental philosophy

**Manifest Activity** Gideon Yaffe,2004-03-25 Manifest Activity presents and critically examines Thomas Reid s doctrines about the model of human power the will our capacities for purposeful conduct and the place of our agency in the natural world Reid is one of the most important philosophers of the 18th century but hitherto under appreciated through the reconstruction of his arguments many of which have never before been discussed Gideon Yaffe demonstrates that Reid s simple prose and direct style belie the complexity of the views he advocates and the subtlety of the reasons he offers in their favour For Reid contrary to the view of many of his predecessors it is simply manifest that we are active with respect to our behaviours it is manifest he thinks that our actions are not merely remote products of forces that lie outside of our control Reid holds instead that actions are all and only those events that spring from active power and he produces insightful and imaginative arguments for the claim that only a creature with a mind is capable of having active power He believes that only human beings and creatures above us are capable of directing events towards ends of endowing them with purpose or direction the distinctive feature of action However he also holds that all events and not merely human actions are products of active power power possessed either by human beings or by God This collection of theses leads Reid to the view that human behaviour and the progress of nature are both essentially teleological Patterns in nature are the products of laws of which God is the author patterns in human conduct are the products of character and the laws that individuals set for themselves Manifest Activity examines Reid s arguments for this view and the view s implications for the nature of character motivation and the special kind of causation involved in the production of human behaviour Yaffe s assessment will greatly profit anyone working on current theories of action and free will as well as historians of ideas
