Discursive Acts:

Discursive Acts Robert Perinbanayagam, 2017-07-05 Language Signs and Selves applies conversational analysis to the discourse of everyday life and its roles in social behavior The explanation offered of the complex elements and processes of language use is theoretically and empirically grounded synthesizing European post structuralist theory and semiotics with American pragmatist currents This book parallels work done under other rubrics sociolinguistics conversation and discourse analysis and ethnomethodology This work however presents the same matter from a different standpoint While ethnomethodology and sociolinguistics focus on certain formal properties of conversations they have pursued the quest for these properties with great methodological rigor while avoiding questions about intentions In their work as in that of many structuralists discourse has become depersonalized with the linguistic form itself becoming an independent entity sealed from the world of selves interaction conflict and suffering Perinbanayagam s interest is in displaying the dialogic properties of such discourses conceiving each element in them as pragmatic and directed In many ways Language Signs and Selves is an enlargement and exemplification of themes discussed in the analysis of language interactions and social relationships The author takes dialogue to be the central event of human being and doing and argues that it is the defining principle of all actions and interactions Drawing from a variety of sources he seeks to construct a theory of interaction between humans that is dialectical in all senses of the word that is to say a theory concerned with dialects and double processes as well as with speaking and the logic of relational processes *Discursive Acts* R. S. Perinbanayagam, 1991

Human Rights Discourse in a Global Network Lena Khor, 2016-05-13 In her innovative study of human rights discourse Lena Khor takes up the prevailing concern by scholars who charge that the globalization of human rights discourse is becoming yet another form of cultural legal and political imperialism imposed from above by an international human rights regime based in the Global North To counter these charges she argues for a paradigmatic shift away from human rights as a hegemonic immutable and ill defined entity toward one that recognizes human rights as a social construct comprised of language and of language use She proposes a new theoretical framework based on a global discourse network of human rights supporting her model with case studies that examine the words and actions of witnesses to genocide Paul Rusesabagina and humanitarian organizations Doctors Without Borders She also analyzes the language of texts such as Michael Ondaatje s *Anil s Ghost* Khor s idea of a globally networked structure of human rights discourse enables actors textual and human who tap into or are linked into this rapidly globalizing system of networks to increase their power as speaking subjects and in so doing to influence the range of acceptable meanings and practices of human rights in the cultural sphere Khor s book is a unique and important contribution to the study of human rights in the humanities that revitalizes viable notions of agency and liberatory network power in fields that have been dominated by negative visions of human capacity and moral action [Psychotherapy as a Developmental Process](#) Michael Basseches, Michael F. Mascolo, 2009-08-05 For all those engaged in psychotherapy practice regardless of

modality or approach the goal of this book is to provide a framework and method for thinking about their work that allows for critical reflection on their own successes and disappointments and on the similarities and differences among their own and other practitioners work with different clients The authors use a novel common factors approach based on the idea that some form of development is the outcome of all effective psychotherapy despite other differences that may exist While most existing psychotherapy research focuses on treatment outcomes primarily in terms of symptom reduction this book offers an alternative research approach that systematically tracks the psychotherapy process itself and describes each case s unique developmental outcome In particular Basseches Mascolo focus on the questions of what kinds of therapeutic resources therapists are offering to their clients and whether and how clients are able to make use of these resources in the service of their own development The goal is to provide a descriptive framework that can be used to appreciate the highly varied ways in which particular therapists tailor their work to unique clients developmental needs while at the same time offering a prescription of a more rigorous method for recognizing and correcting the problem when a particular therapist s way of working is not serving the client well Ideally this type of process focused research will complement existing outcome research and be more likely than further symptom reduction studies to result in the improvement of overall psychotherapy success rates

Speech Acts Andreas H. Jucker, 2024-08-31 This Element outlines current issues in the study of speech acts It starts with a brief outline of four waves of speech act theory that is the philosophical the experimental the corpus based and the discursive approaches It looks at some of the early experimental and corpus based methods and discusses their more recent developments as a background to the most important trends in current speech act research Discursive approaches shift the focus from single utterances to interaction and interactional sequences Multimodal approaches show that the notion of speech act needs to be extended in order to cover the multimodality of communicative acts And diachronic approaches focus on the historicity of speech acts The final section discusses some open issues and potential further developments of speech act research
