Chance And Change:

Chance, Character, and Change John Mattausch, 2017 Chance is real Not only is it a cause of societal change but we as individuals are chance given characters who discover and build our character in chancy circumstances Chance is also expressed as coincidence and contingency expressions which have episodically been of undeniable historical importance Mattausch asserts the conventional picture of societal change is incorrect Societal change is not a linear succession with each phase of change replacing its predecessor Instead the process is one of accumulative change in which chance plays various roles Chance Character and Change develops the idea of chance situating it within the history of thought and social change By focusing strictly on manifestations of chance and of luck that can be seen and explained Mattausch is able to show how chance acts in the environment of evolution and the social practices that regulate the inheritance of knowledge and technology This in turn steers societal change and how change itself occurs Chance s role is often characterized as coincidence or contingency and this automatically is seen as progressive or degenerate However Mattausch notes that accumulative change is potentially both progressive as well as decadent Chance also plays a part in the social aspects of our world customs practices cultures societies and politics When we act Mattausch argues we do not distinguish between good and bad but rather between determinism and chance the latter is a test of character not of free will This theory is general in its assertions and application and can be related to many areas of study from economic theory to human behavior to politics The rich texture of the writing and vivid use of examples from daily life and the work of other major thinkers draw in the reader The most striking aspect of this work is the author s writing style and the way he weaves together evidence classic research and contemporary thought It is skillfu Provided by publisher **Giving Change a Chance ...
