Church Laws and Ecumenism Norman Doe,2020-09-27 Written by experts from within their communities this book compares the legal regimes of Christian churches as systems of religious law The ecumenical movement with its historical theological focus has failed to date to address the role of church law in shaping relations between churches and fostering greater mutual understanding between them In turn theologians and jurists from the different traditions have not hitherto worked together on a fully ecumenical appreciation of the potential value of church laws to help and sometimes to hinder the achievement of greater Christian unity This book seeks to correct this ecumenical church law deficit It takes account of the recent formulation by an ecumenical panel of a Statement of Principles of Christian Law which has been welcomed by Pope Francis and the Ecumenical Patriarch of Constantinople leader of the Orthodox Church worldwide as recognizing the importance of canon law for ecumenical dialogue This book therefore not only provides the fruits of an understanding of church laws within ten Christian traditions but also critically evaluates the Statement against the laws of these individual ecclesial communities The book will be an essential resource for scholars of law and religion theology and sociology It will also be of interest to those working in religious institutions and policy makers

Consensus in the Classroom Linda Sartor,Molly Young Brown,2004 Born out of a passionate interest in environmental education Linda Sartor began experimenting with consensus decision making in her public school classrooms This book reports on what she did and what she discovered in the process She found that consensus in the classroom works as both an instructional strategy and a classroom management approach and fosters a lively learning community It both requires and generates a paradigm shift in a teacher s relationship with students and students relationships with each other This book will inspire and assist educators to use the consensus process in and out of the classroom

Expose, Oppose, Propose William K. Carroll,2016-07-15 Neoliberal capitalism positions us all as consumers in a hypermarket where money talks For the majority of people around the globe this translates as precarity and immiseration But how can we break from this dominant ideological framework Expose Oppose Propose details how since the mid 1970s transnational alternative policy groups TAPGs have functioned as think tanks of a different sort generating resources for a globalization from below in dialogue with the critical social movements that are protagonists

for global justice Based on two years of intensive research William Carroll not only provides a detailed examination of a variety of TAPGs showing how each group is distinctive and autonomous in its vision practical priorities and ways of producing and mobilizing alternative knowledge but also reveals how TAPGs form a master frame that advocates and envisages global justice and ecological wellbeing
