Minor Knowledge and Microhistory Sigurdur Gylfi Magnusson, David Olafsson, 2016-10-04 This book studies everyday writing practices among ordinary people in a poor rural society in the 19th and early 20th centuries Using the abundance of handwritten material produced disseminated and consumed some centuries after the advent of print as its research material the book's focus is on its day to day usage and on minor knowledge i e text matter originating and rooted primarily in the everyday life of the peasantry The focus is on the history of education and communication in a global perspective Rather than engaging in comparing different countries or regions the authors seek to view and study early modern and modern manuscript culture as a transnational or transregional practice giving agency to its ordinary participants and attention to hitherto overlooked source material Through a microhistorical lens the authors examine the strength of this aspect of popular culture and try to show it in a wider perspective as well as asking questions about the importance of this development for the continuity of the literary tradition The book is an attempt to explain the nature of the literary culture in general how new ideas were transported from one person to another from community to community and between regions essentially the role of minor knowledge in the development of modern men

Distance and Documents at the Spanish Empire's Periphery Sylvia Sellers-García, 2013-12-11 The Spanish Empire is famous for being at its height the realm upon which the sun never set It stretched from the Philippines

to Europe by way of the Americas And yet we know relatively little about how Spain managed to move that crucial currency of governance paper over such enormous distances Moreover we know even less about how those distances were perceived and understood by people living in the empire This book takes up these unknowns and proposes that by examining how documents operated in the Spanish empire we can better understand how the empire was built and most importantly how knowledge was created The author argues that even in such a vast realm knowledge was built locally by people who existed at the peripheries of empire Organized along routes and centralized into local nodes peripheral knowledge accumulated in regional centers before moving on to the heart of the empire in Spain The study takes the Kingdom of Guatemala as its departure point and examines the related aspects of documents and distance in three sections part one looks at document genre and how the creation of documents was shaped by distance part two looks at the movement of documents and the workings of the mail system part three looks at document storage and how archives played an essential part in the flow of paper
