Communication Satellite Systems Technology reviews the state of the art in communication satellite systems technology Topics covered range from commercial point to point systems and military satellite communication systems to satellite support subsystems and components along with high power systems Communication satellites are also discussed from a sociological perspective Comprised of 50 chapters this book begins with a 1945 article by Arthur C Clarke in which he proposed the construction of rocket space stations in orbit that would provide complete radio coverage of the globe as well as extraterrestrial relay services The reader is then introduced to the Early Bird satellite and its hydrogen peroxide orbit control and orientation

system Details of the sequence of maneuvers required after transfer ellipse injection until final placement in a stationary orbit are given The methods of calculation of maneuver parameters as well as numerical examples of certain Early Bird orbit changes and maneuver parameters are described The effects of the principal long term disturbing forces on the satellite are also considered Subsequent chapters focus on military satellite communication systems satellite support subsystems and components high power systems and systems concepts The organization and program of Intelsat are also evaluated This monograph will be of value to practitioners in the fields of aeronautics astronautics and satellite communications

**Communications Satellites** Larry Blonstein, 2017-05-03 Communications Satellites The Technology of Space Communications focuses on the technologies and approaches employed in communications satellites The book first tackles geosynchronous orbit low orbit to geosynchronous altitude disturbances in orbit and turning a crate into a satellite Topics include thermal and electrical power station keeping and pointing The publication then ponders on on board communications equipment logarithms and decibels and radio frequencies and wavelengths and their allocations Discussions focus on fixed broadcast and mobile services complete satellite transponders and antennas The manuscript examines earth stations traffic capacity and quality selecting a satellite and economic system optimization Compression and modulation techniques echo and delay encryption space loss estimation of traffic capacity and quality and up link transmission are discussed The text then elaborates on the economics of satellite communications and operational systems The publication is valuable reference for readers interested in the technologies and approaches involved in communications satellites **The Basics of Satellite Communications** Joseph N.
