Fractalize That! : A Visual Essay On Statistical Geometry John Shier,2018-11-22 Fractalize That A Visual Essay on Statistical Geometry brings a new class of geometric fractals to a wider audience of mathematicians and scientists It describes a recently discovered random fractal space filling algorithm Connections with tessellations and known fractals such as Sierpinski are developed And the mathematical development is illustrated by a large number of colorful images that will charm the readers The algorithm claims to be universal in scope in that it can fill any spatial region with smaller and smaller fill regions of any shape The filling is complete in the limit of an infinite number of fill regions This book presents a descriptive development of the subject using the traditional shapes of geometry such as discs squares and triangles It contains a detailed mathematical treatment of all that is currently known about the algorithm as well as a chapter on software implementation of the algorithm The mathematician will find a wealth of interesting conjectures supported by numerical computation Physicists are offered a model looking for an application The patterns generated are often quite interesting as abstract art Readers can also create these computer generated art with the advice and examples provided

Georgia through Earth, Fire, Air and Water
Michael P. Berman,2012-05-25 Despite being located on the extreme eastern boundary of Europe and having been frequently

conquered by invading people from Asia including Arabs Turks Persians Mongols and more recently Russians Georgians still regard themselves very much as Europeans and it is to becoming a future member state of the EU that the majority of the people now aspire As for the traditional folk tales from the region one of their main characteristics is that they are packed with action Whilst a written literary novel or short story might devote paragraphs to descriptions of people or places these tales usually settle for an adjective or two a thick impassable forest a handsome stately man or a formula such as not seen beneath the sun beauty Many of the heroes and heroines do not even have names Hunt 1999 p 8 Safely cocooned or so we like to kid ourselves in our sanitised western urban environment we tend to take the elements for granted However tales from a time when the Earth was new help to jolt us out of our daily lethargy as do the stories in this collection a number of which have never been translated from Georgian direct into English before
