Easy Does It! Multiplication Carole S. Tobin,1987-09-01      **Easy mathematics** Oliver Lodge,2000      Easy Mathematics, Chiefly Arithmetic Sir Oliver Lodge,1906      **El-Hi Textbooks and Serials in Print** ,2006      Fast Ideas for Busy Teachers: Math, Grade 5 Armstrong,2009-01-04 Mingle some math into everyday teaching Fast Ideas for Busy Teachers Math has hundreds of ideas that will fit into a hectic schedule and enliven fifth grade students exploration of mathematics The book is organized by math skills which makes it easy to find a topic when it s needed Open ended lessons allow adaptation of activities to meet students needs The lessons are perfect for substitutes rainy day activities homework and in class assignments The book includes tips for managing a classroom getting organized getting to know students and implementing behavior management This 80 page book also includes reproducibles and aligns with Common Core State Standards as well as state and national standards      **The Mad Math Manual** Ahmad W. Chamoun,2022-07-20 After studying and teaching math and science over the years I realized that many good opportunities for learning and teaching important and essential things were missing from the resources that were available Included in this book are many exercises techniques and insights that strengthen a learner s mathematical and logical abilities which are simply not to be found anywhere else Also included are things which I have learned from different disparate places that for the student s convenience have all been gathered into one place and which I attempted to explain in simpler terms than what is currently available Afterall it is hard enough to learn these concepts let alone have to shift through all of the data to find what really pertains to one s study Some of the material presented are things which I myself found to be the most confusing In this regard I hope that the manual can be a great resource for students trying to learn more about math and science as well as the workings of nature Even though it is unlikely a reader will be able to understand all of the material presented on their own and without the presence of a teacher having another resource in which the material and concepts are presented in a unique and simpler way is highly useful Generally when people learn about math and science they are usually not satisfied by the answer that their teacher or textbook has to give on why nature settled on a certain constant or equation It s mind boggling to me how many people fail to acknowledge the relatedness of many physical constants as well as the logic behind some of the greatest discoveries and in effect are missing out on a lot of the beauty behind science and the workings of nature      *Miracle Math* Harry Lorayne,1992 Presents mathematical shortcut and how to develop a calculator in your head      **Learning How to Learn** Barbara Oakley, PhD, Terrence Sejnowski, PhD, Alistair McConville,2018-08-07 A surprisingly simple way for students to master any subject based on one of the world s most popular online courses and the bestselling book *A Mind for Numbers* *A Mind for Numbers* and its wildly popular online companion course *Learning How to Learn* have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with Fans often wish they d discovered these learning strategies earlier and ask how they can help their kids master these

skills as well Now in this new book for kids and teens the authors reveal how to make the most of time spent studying We all have the tools to learn what might not seem to come naturally to us at first the secret is to understand how the brain works so we can unlock its power This book explains Why sometimes letting your mind wander is an important part of the learning process How to avoid rut think in order to think outside the box Why having a poor memory can be a good thing The value of metaphors in developing understanding A simple yet powerful way to stop procrastinating Filled with illustrations application questions and exercises this book makes learning easy and fun **The Chautauquan** ,1884 **France** ,1918
