Major American Higher Education Issues and Challenges in the 1990s Richard I. Miller,1990 Public and private higher education boards of control rightfully demand that higher education policies reflect rational and systematic approaches to the future Thinking and planning ahead of major post secondary issues and problems therefore becomes incumbent upon chief executive officers and their staffs in all types of colleges and universities US educational officials planned more seriously in the 70s when resources were diminishing than in the 80s when several years of unprecedented sustained economic growth provided greater flexibility and use of ongoing and new human and material resources But a return to leaner years can be expected in the 1990s and with it a greater emphasis on planning ahead
