Changing Paths International Development:

Changing Paths Peter P. Houtzager, Michael Peter Moore, 2009-12-14 Explores how the world's disadvantaged may be enabled to claim a greater share of material wealth

Immiserizing Growth Paul Shaffer, Ravi Kanbur, Richard Sandbrook, 2019-02-14 Immiserizing growth occurs when growth fails to benefit or harms those at the bottom. It is not a new concept appearing in some of the towering figures of the classical tradition of political economy including Malthus, Ricardo, and Marx. It is also not empirically insignificant, occurring in between 10% and 35% of cases. In spite of this, it has not received its due attention in the academic literature dominated by the prevailing narrative that growth is good for the poor. *Immiserizing Growth: When Growth Fails the Poor* challenges this view to arrive at a better understanding of when, why, and how growth fails the poor. Taking a diverse disciplinary perspective, *Immiserizing Growth* combines discussion of mechanisms of this troubling economic phenomenon with empirical data on trends in growth, poverty, and related welfare indicators. It draws on political economy, applied social anthropology, and development studies, including contributions from experts in these fields. A number of methodological approaches are represented, including statistical analysis of household survey and cross-country data, detailed ethnographic work, and case study analysis drawing on secondary data. Geographical coverage is wide, including Bolivia, the Dominican Republic, Ecuador, India, Indonesia, Mexico, Nigeria, the People's Republic of China, Singapore, and South Korea, in addition to cross-country analysis. This volume is the first full-length treatment of immiserizing growth and constitutes an important step in redirecting attention to this major challenge.

Public Sector Reform in Developing and Transitional Countries Christopher Rees, Farhad Hossain, 2013-09-13 Over recent decades decentralization has emerged as a key Public Sector Reform strategy in a wide variety of international contexts. Yet despite its emergence as a ubiquitous activity that cuts across disciplinary lines in international development, decentralization is understood and applied in many different ways by parties acting from contrary perspectives. This book offers a fascinating insight into theory and practice surrounding decentralization activities in the Public Sectors of developing and transitional countries. In drawing on the expertise of established scholars, the book explores the contexts, achievements, progress, and challenges of decentralization and local governance. Notably, the contributions contained in this book are genuinely international in nature; the chapters explore aspects of decentralization and local governance in contexts as diverse as Ghana, Hong Kong, India, Indonesia, Kazakhstan, Morocco, Tanzania, Uganda, and Viet Nam. In summary, by examining the subject of decentralization with reference to specific developing and transitional Public Sector contexts in which it has been practiced, this book offers an excellent contribution towards a better understanding of the theory and practice of decentralization and local governance in international settings. This book was published as a special double issue of the *International Journal of Public Administration*.

How childhood stunting reduced in Tamil Nadu: An analysis of change between 1992 and 2016 Avula, Rasmi, Menon, Purnima, Nguyen, Phuong Hong, Constantinides, Shilpa, Kohli, Neha, 2021-12-23 India comprises

one sixth of the world's population and one third of the global burden of undernutrition. Between 2006 and 2016 India made progress in reducing stunting among children below five years; the progress however has not been uniform across all its states. Menon et al. (2018) There are interstate differences in stunting reduction despite a common national policy framework for nutrition specific and nutrition sensitive programs. Given the paucity of insights on what factors drive successful change in nutritional outcomes such as stunting at the state level in India, we conducted studies in the four states of Chhattisgarh, Gujarat, Odisha and Tamil Nadu. In this report we document the story of change in Tamil Nadu which is one of the exemplary states in India. With a long history of nutrition and health reforms, it stands out as a leader in social development. We aimed to update prior work on Tamil Nadu to assess more recent changes in nutritional outcomes, determinants and coverage of interventions. Our key goals were to: 1) examine changes in child stunting, known determinants of stunting and key health and nutrition interventions between 1992 and 2016; 2) assess the contribution of diverse determinants and intervention coverage changes to the changes in stunting between 2006 and 2016; and 3) interpret the changes in the context of policies, programs and other changes in the state.

Reducing Urban Poverty in the Global South David Satterthwaite, Diana Mitlin, 2013-08-15. Urban areas in the Global South now house most of the world's urban population and are projected to house almost all its increase between now and 2030. There is a growing recognition that the scale of urban poverty has been overlooked and that it is increasing both in numbers and in the proportion of the world's poor population that live and work in urban areas. This is the first book to review the effectiveness of different approaches to reducing urban poverty in the Global South. It describes and discusses the different ways in which national and local governments, international agencies and civil society organizations are seeking to reduce urban poverty. Different approaches are explored for instance market approaches, welfare rights based approaches and technical professional support. The book also considers the roles of clientelism and of social movements. Case studies illustrate different approaches and explore their effectiveness. **Reducing Urban Poverty in the Global South** also analyses the poverty reduction strategies developed by organized low income groups, especially those living in informal settlements. It explains how they and the federations or networks they have formed have demonstrated new approaches that have challenged adverse political relations and negotiated more effective support. Local and national governments and international agencies can become far more effective at addressing urban poverty at scale by, as is proposed in this book, working with and supporting the urban poor and their organizations. This book will be an invaluable resource for researchers and postgraduate students in urban development, poverty reduction, urban geography and for practitioners and organisations working in urban development programmes in the Global South.

[Accountability Politics](#) Jonathan Fox, 2007-12-13. How can the seeds of accountability ever grow in authoritarian environments? This book explores how civil society thickens by comparing two decades of rural citizens' struggles to hold the Mexican state accountable, exploring both change and continuity before, during and after national electoral turning points.

Pro-poor Land Reform

Saturnino M. Borras,2007-09-06 Using empirical case materials from the Philippines and referring to rich experiences from different countries historically this book offers conceptual and practical conclusions that have far reaching implications for land reform throughout the world Examining land reform theory and practice this book argues that conventional practices have excluded a significant portion of land based production and distribution relationships while they have inadvertently included land transfers that do not constitute real redistributive reform By direct implication this book is a critique of both mainstream market led agrarian reform and conventional state led land reform It offers an alternative perspective on how to move forward in theory and practice and opens new paths in land policy research **Political Economy and the Aid**

Industry in Asia J. Hutchison,W. Hout,C. Hughes,R. Robison,2015-12-25 Adopting a distinctive structural political economy approach this book uniquely explains the blind spots of alternative political economy approaches to international aid and presents an original framework for evaluating likely reformers strength of commitment and potential alliances with donors
