

TRAGEDY OF THE COMMONS

The Tragedy of the Commons refers to a situation where individuals, acting independently and rationally, deplete or exploit a shared resource, leading to its degradation or depletion.

OVERVIEW

The Tragedy of the Commons arises when individuals prioritize their own self-interest over the common good.

Without proper regulations or mechanisms to manage the resource, the result is often overconsumption, environmental degradation, or even the collapse of the resource system. The concept highlights the need for collective action.

EXAMPLE

An example of the Tragedy of the Commons is overfishing in the open ocean. When multiple fishing vessels operate independently and try to maximize their catch, they often end up depleting fish populations beyond sustainable levels. This leads to a decline in fish stocks, affecting not only the individual fishermen but also the larger ecosystem.

Commons Without Tragedy:

Parks and Carrying Capacity Robert E. Manning, 2007-02-19 *Parks and Carrying Capacity* is an important new work for faculty graduate and undergraduate students and researchers in outdoor recreation park planning and management and natural resource conservation and management as well as for professional planners and managers involved with park and outdoor recreation related agencies and nongovernmental organizations

What Postcolonial Theory Doesn't Say Anna Bernard, Ziad Elmarsafy, Stuart Murray, 2015-08-11 This book reclaims postcolonial theory addressing persistent limitations in the geographical disciplinary and methodological assumptions of its dominant formations It emerges however from an investment in the future of postcolonial studies and a commitment to its basic premise namely that literature and culture are fundamental to the response to structures of colonial and imperial domination To a certain extent postcolonial theory is a victim of its own success not least because of the institutionalization of the insights that it has enabled Now that these insights no longer seem new it is hard to know what the field should address beyond its general commitments Yet the renewal of popular anti imperial energies across the globe provides an important opportunity to reassert the political and theoretical value of the postcolonial as a comparative interdisciplinary and oppositional paradigm This collection makes a claim for what postcolonial theory can say through the work of scholars articulating what it still cannot or will not say It explores ideas that a more aesthetically sophisticated postcolonial theory might be able to address focusing on questions of visibility performance and literariness Contributors highlight some of the shortcomings of current postcolonial theory in relation to contemporary political developments such as Zimbabwean land reform postcommunism and the economic rise of Asia Finally they address the disciplinary geographical and methodological exclusions from postcolonial studies through a detailed focus on new disciplinary directions management studies international relations disaster studies overlooked locations and perspectives Palestine Weimar Germany the commons and the necessity of materialist analysis for understanding both the contemporary world and world literary systems

Commons Without Tragedy Robert Vernon Andelson, 1991 This book is in the philosophical tradition that originated in the early 17th century with Grotius the father of international law The most recent and controversial expression of this debate began with the work of Professor Hardin whose original paper in *Science* has since been reprinted in over 80 anthologies These matters of jurisprudence and biology ought to resolve the problem of whether people acting selfishly exhaust finite resources Since they believe that this is so they proposed a remedy in terms of property rights The Grotius Hardin problematic has now re emerged with greater urgency thanks to the fact that Space Age technology has once again transported mankind to what are the final frontiers and confronted him with the choices about how to tap virgin resources on the new commons The imminent prospect of exploration in and exploitation of the ocean beds the arctic regions and outer space necessitate a new debate about social justice economic efficiency and ecological conservation Unfortunately the debate thus far has not been particularly

illuminating or sensitive to the mistakes of the past Commons Without Tragedy reopens this topic in the form of a dialogue between Hardin and the economists who are in the philosophical tradition of Henry George with Andelson offering a new interpretation of Hardin's original thesis which Hardin himself has acknowledged in the most generous terms Indeed Hardin's acknowledgement of the importance of George is most startling and dramatic The debate is not exclusively located in the ethereal domain for the controversy necessarily confronts difficult questions about existing problems of demographic pressure on the land based resources that have already been privatized

Space, Power and the Commons Samuel Kirwan, Leila Dawney, Julian Brigstocke, 2015-10-23 Across the globe political movements opposing privatisation enclosures and other spatial controls are coalescing towards the idea of the commons As a result struggles over the commons and common life are now coming to the forefront of both political activism and scholarly enquiry This book advances academic debates concerning the spatialities of the commons and draws out the diverse materialities temporalities and experiences of practices of commoning Part one Materialising the Commons focuses on the performance of new geographical imaginations in spatial and material practices of commoning Part two Spaces of Commoning explores the importance of the turn from commons to commoning bringing together chapters focusing on the doing of commons and how spaces materials bodies and abstract flows are intertwined in these complex and excessive processes Part three An Expanded Commons explores the broader registers and spaces in which the concept of the commons is at stake and highlights how and where the commons can open new areas of action and research Part four The Capture of the Commons questions the particular interdependence of the commons and enclosure assumed within commons literature framed by the concept of neoliberalism Providing a comprehensive introduction to the diverse ways in which ideas of the commons are being conceptualised and enacted both throughout the social sciences and in practical action this book foregrounds the commons as an arena for political thought and sets an agenda for future research

Emissions Trading Schemes Sanja Bogojevic, 2013-07-04 This book makes a strong argument for reconfiguring the common understanding of emissions trading schemes as regulatory strategies and sets out a framework for analysis to sustain that reconfiguration

The Common Good and the Global Emergency T. J. Gorringer, 2011-02-03 Provides a theoretical and political framework of the common good and applies this to the built environment

The Culture of Nature in the History of Design Kjetil Fallan, 2019-03-26 The Culture of Nature in the History of Design confronts the dilemma caused by design's pertinent yet precarious position in environmental discourse through interdisciplinary conversations about the design of nature and the nature of design Demonstrating that the deep entanglements of design and nature have a deeper and broader history than contemporary discourse on sustainable design and ecological design might imply this book presents case studies ranging from the eighteenth to the twenty first century and from Singapore to Mexico It gathers scholarship on a broad range of fields practices from urban planning landscape architecture and architecture to engineering design industrial design furniture design and graphic design From adobe

architecture to the atomic bomb from the bonsai tree to Biosphere 2 from pesticides to photovoltaics from rust to recycling the culture of nature permeates the history of design As an activity and a profession always operating in the borderlands between human and non human environments design has always been part of the environmental problem whilst also being an indispensable part of the solution The book ventures into domains as diverse as design theory research pedagogy politics activism organizations exhibitions and fiction and trade literature to explore how design is constantly making and unmaking the environment and conversely how the environment is both making and unmaking design This book will be of great interest to a range of scholarly fields from design education and design history to environmental policy and environmental history

Urban Village Redevelopment in Beijing, China Ran Liu,2024-06-12 The book provides a multi stage assessment of the changing housing opportunities of migrant workers in the three stages of Beijing s urban village development emergence erasure and preservation The volume re theorizes Henry Lefebvre s notion of the right to the city as a largely property based concept that falls within the city s hybrid tenure matrix of varying degrees of tenure security and formality that is undergoing entrepreneurialization or gentrification This is another highly valuable contribution to China studies from the geographical perspective of the territorial politics at play in the process of urban village redevelopment which has fostered a new propertied landowning class as winners while moving low wage migrants The book takes the reader on a fascinating journey from peri urban villages to IT worker villages to artists villages revealing a restless landscape of urbanism and state centered governance as well as bottom up counterplots The fieldwork explores the contradictions of urban village redevelopment in Beijing On the one hand it is state dominated and yet creates new housing opportunities for migrants on the other it disrupts old orders but also encourages new forms of grassroots alliances The empirical studies of

Beijing's urban villages enrich Henry Lefebvre's discourse on planetary urbanisation Gilles Deleuze and Félix Guattari's notion of the rhizome and Elinor Ostrom's ideas on the wise management of the commons
