Economics Reading Lists, Course Outlines, Exams, Puzzles & Problems: Econometrics reading lists ,1995 **Southern Economic Journal** ,1927 **The Limits of Econometrics** A. C. Darnell,Lynne Evans,1990 Econometric issues have provoked a lively and sometimes adversarial debate in the economics profession The excitement and intellectual vitality of that debate is captured here for the reader in a lucid overview of econometric approaches describing their advantages and limitations This ambitious book focuses on the underlying methodological issues rather than concentrating upon econometric techniques The limits of econometric investigations are identified through a critical appraisal of three different approaches associated with the work of Professors Hendry Leamer and Sims After explaining why the early optimism in econometrics was misplaced it argues that rejection is not an appropriate response It offers a rich spectrum of approaches to a problem of central importance in the development of modern economics The book will appeal not only to all econometricians whatever their persuasion but also to all those with an interest in the methodology of economics

The Determinants and Impact of Property Rights Lee J. Alston,Gary D. Libecap,Robert Schneider,1996 This paper provides new empirical results regarding the demand and supply of title its impact on land value and its effects on agricultural investment on Brazilian frontiers We use survey data from 1992 and 1993 from the state of Par with data on the characteristics of the settlers land

tenure land agencies involved land values and investment We then turn to census data from the Brazilian agricultural census from 1940 through 1985 with observations at the municipio county level to examine the development of property rights to land in the southern state of Paran during the agricultural boom between 1940 and 1970 and in the Amazon state of Par during the period of rapid migration to the region after 1970 By examining frontiers we can follow the rise in land values the increase in the demand for title and the response of government The empirical findings support the predictions of the theory regarding the effects of title and investment on land value the role of expected change in value on demand for title and the contribution of title in promoting investment Governments however have not exactly followed the predictions of the analytical framework in supplying title Political and bureaucratic factors play an important role in the government response to demands for title This result suggests that researchers must pay special attention to the complex political process by which property rights are assigned in studying the emergence of tenure institutions
