Levine, 2013-04-05 *Pathology of the Capitalist Spirit* is about capital and about the economic system that bears its name In this book Levine argues that our pursuit of ever more wealth in the form of capital expresses our dissatisfaction with the world we live in with what we have and what we don't have Capital embodies our hope for something different Because capital embodies this hope it has become desire's object In his study of capitalism Levine explores the

meaning of capital as a social reality connected to fundamental human aspirations The link between capital and the pursuit of a hoped for state is especially important in light of the stubborn insistence on the part of its critics that capitalism exists to serve the material interests of those whose vocation is to own capital This misunderstanding ignores what is essential about capital which is its link not to interests but to hope especially the hope that by accumulating capital the individual can achieve an attachment to the good It is this hope that blocks tolerance of any notion that there is something unfair in the capitalist s acquisition of wealth and that fairness can be achieved through its redistribution to others It is also this hope that animates the capitalist system as a whole And in that sense this hope is the spirit of capitalism To develop this theme Levine calls on the ideas and writings of major theorists involved with understanding modernity and capitalism Adam Smith Karl Marx Max Weber Emile Durkheim and Joseph Schumpeter

The Protestant Ethic and the Spirit of Capitalism Max Weber,2020-05-29 Max Weber s celebrated thesis which explores the relationship between Protestant work ethic and the emergence of capitalist enterprise is presented here inclusive of his lengthy notes In coining the phrase Protestant work ethic Weber demonstrates a series of parallels between certain Protestant denominations and the modern business The veneration of hard work discipline and carefulness with money birthed a culture that led over generations to the establishment of capitalism with enough workers sharing in these beliefs entrepreneurs were able to create large businesses that could consistently deliver a profit Using examples such as Martin Luther and Calvinist doctrines Weber demonstrates how ideas of the virtues of diligence were placed parallel with God and morality By working hard every man was contributing to a better world and society in the name of the Lord However Weber asserts that over time the religious connotations behind capitalist enterprise largely disappeared the famous writings of Benjamin Franklin are cited as example whereby notions of diligence were expressed eloquently but no longer cited God and holy virtue Though controversial Weber s work remains much consulted by sociologists The notion that Protestantism contributed to or accelerated the development of capitalism is popular in the modern day
