Contents Introduction      **Cataclysmic Variables and Related Objects** Margherita Hack, Constanze La Dous, 1993 This volume begins with an introductory chapter on general properties of cataclysmic variables Chapters 2 through 5 of Part 1 are devoted to observations and interpretation of dwarf novae and nova like stars Chapters 6 through 10 Part 2 discuss the general observational properties of classical and recurrent novae the theoretical models and the characteristics and models for some well observed classical novae and recurrent novae Chapters 11 through 14 of Part 3 are devoted to an overview of the observations of symbiotic stars to a description of the various models proposed for explaining the symbiotic phenomenon and to a discussion of a few selected objects respectively Chapter 15 briefly examines the many unsolved problems posed by the observations of the different classes of cataclysmic variables and symbiotic stars      *Cataclysmic Variables and Related Objects* A. Evans, Janet H. Wood, 2012-12-06 In 1993 we began to consider the possibility of holding a conference on Cataclysmic Variables CVs at Keele University There have been several meetings in the area of CVs recently e.g. Eilat Abano Padova Capetown However as preparations for the Keele meeting progressed we realized that while there had been a number of IAU meetings devoted to related and to peripheral topics such as IAU Colloquium 122 on Classical Novae in 1989

IAU Colloquium 129 on Accretion Disks in 1990 there had been no IAU sponsored conferences in the area of cataclysmic variables CVs for a number of years We felt therefore that the time was ripe to have an IAU meeting devoted to an overview of CVs and related objects and the SOC organized the conference such that there was an emphasis on invited reviews of the most recent advances in the field The conference covered both CVs and LMXBs and the inter relations between them The meeting was held at a time when powerful satellite observatories and rapid improvements in ground based instrumentation had led to many advances in both CV and LMXB research The conference provided a forum to review observations from ASCA EUVE ROSAT Ginga and the recently refurbished HST Photo metric spectroscopic and polarimetric observations of CVs and LMXBs have thrown new light on the distribution of matter and the nature of the stellar components in these systems Physics Briefs ,1993

**Unveiling Accretion Disks - Physical Parameter Eclipse Mapping of Accretion Disks in Dwarf Novae** Sonja Isaacs,2002-03-27 Doctoral Thesis Dissertation from the year 1997 in the subject Astronomy grade cum laude University of G ttingen language English abstract Diese Arbeit stellt eine neue Tomographiemethode vor die Bedeckungstomographie in physikalischen Parametern Physical Parameter Eclipse Mapping Sie ist entwickelt um die Struktur von Akkretionsscheiben in kataklysmischen Ver nderlichen direkt in Form der grundlegenden physikalischen Parameter zu kartieren Kataklysmische Ver nderliche sind enge Doppelsternsysteme in denen Materietransfer von einem der Sterne typischerweise ein Hauptreihenstern zum anderen einem wei en Zwerg stattfindet und zu der Ausbildung einer Akkretionsscheibe f hrt Akkretionsscheiben sind von generellem Interesse in der Astrophysik da sie in einer Vielzahl von Objekten mit Masseneinfall auftreten wie z B aktiven galaktischen Kernen und jungen stellaren Objekten Bedeckende kataklysmische Ver nderliche sind ideale Laboratorien um solche Akkretionsprozesse zu untersuchen da mit Ver nderung der Bahnphase unterschiedliche Teile der Scheibe sichtbar werden **Catalog of Einstein (HEAO-2) Observations, July 25, 1986** Frederick D. **Cataclysmic Variables. Recent Multi-Frequency Observations and Theoretical Developments** H. Drechsel,Y. Kondo,Jürgen H. Rahe,2012-12-06 Recent advances in observational and theoretical efforts in understanding the nature of cataclysmic variables had reached such maturity that there existed a strong shared feeling among the workers in this field that an international colloquium sponsored by the International Astronomical Union would be timely To be more specific this was due primarily to the accumulation of the new data from satellite observatories such as the International Ultraviolet Observatory IUE and EXOSAT as well as ground based optical and radio telescopes and the advances in modeling the putative accretion disks and the thermo nuclear run away phenomena in the vicinity of the white dwarf stars in cataclysmic variables A series of workshops on this subject held in North America over the past several years and that held in Europe in 1985 had all contributed to the advances in our knowledge that led to IAU Colloquium No 93 held in Bamberg from the 16th to 19th of June 1986 In all 157 astronomers from 27 countries participated in this conference Judging from the papers presented both invited and contributed and from the enthusiasm seen in discussions the meeting

White,L. G. Filipov,1988 **The Eighth Pacific Rim Conference on Stellar Astrophysics** Boonrucksar Soonthornthum,2009 The Pacific Rim Conference on Stellar Astrophysics PRCSA is a series of conferences which initially focused on binary star research yet over the years it has grown wider in scope to include topics regarding the most fundamental building blocks of modern astronomy and astrophysics Since its inception in 1985 each conference has been held in a country on the Asian Rim of the Pacific In the most recent decade the conference has been held every three years The 8th PRCSA was held in Phuket Thailand in May 2008 Although it is called the Pacific Rim conference series the participants are not restricted to scientists from Pacific Rim countries This conference has attracted nearly 100 participants from 23 countries from far regions of the world The 2008 conference also served another important purpose to honor Prof Kam Ching Leung for his contribution in supporting the development of astronomy in Asia particularly in Thailand The proceedings of this conference are published in this volume and include contributions on stars star formation novae supernovae compact objects binary stars cataclysmic variables variable stars binary and multiple star systems brown dwarfs and planetary companions stars clusters and large scale surveys Publisher s website
