and indigenous cultures militate against the homogenization of the globe along Western lines

World Development Indicators 2011 World Bank, 2011 World Development Indicators WDI is the World Bank's annual compilation of data about development. This statistical work allows readers to consult over 800 indicators for more than 150 economies and 14 country groups in more than 90 tables. It provides a current overview of regional data and income group analysis in six thematic sections: World View, People, Environment, Economy, States and Markets, and Global Links. This book presents current and accurate development data on both a national level and aggregated globally. It allows readers to monitor the progress made toward meeting the Millennium Development Goals endorsed by the United Nations and its member countries, the World Bank, and a host of partner organizations. These goals, which focus on development and the elimination of poverty, serve as the agenda for international development efforts. The CD-ROM contains time series data for more than 200 economies from 1960-2009, single year observations, and spreadsheets on many topics. It contains more than 1,000 country tables and the text from the WDI 2010 print edition. The Windows-based format permits users to search for and retrieve data in spreadsheet form, create maps and charts, and fully download them into other software programs for study or presentation purposes.

World Development Indicators [computer File] World Bank, 2004. Annotation: Chapters in this book focus on the people, economy, environment, states and markets, world view, and global links for 148 countries. The State of World Rural Poverty Idriss Jazairy, Mohiuddin Alamgir, Theresa Panuccio, 1992. Despite almost four decades and billions of dollars in development activities, we are barely in a position to track the changing dynamics of poverty or to define with conviction the processes that entrap the poor in their misery. Accounting for about 90% of global poverty, rural poverty through transmigration is also a main contributor to urban poverty. It is in the rural areas of the world where poverty is most severe in human terms, where the hunger, hopelessness, hardship, and despair commonly associated with entrenched poverty are most pronounced, where basic health services, sanitation, educational opportunities, and other common amenities are most lacking. The alleviation of rural poverty is therefore tantamount to the alleviation of global poverty in its entirety. **The State of World Rural Poverty** offers the first comprehensive look at the economic conditions and prospects of the world's rural poor.
