Dialectic Of Freedom:

The Dialectic of Freedom Maxine Greene, 1988 Special 2018 Edition From the new Introduction by Michelle Fine Graduate Center CUNY Why now you may ask should I return to a book written in 1988 Because in Maxine's words When freedom is the question it is always time to begin In *The Dialectic of Freedom* Maxine Greene argues that freedom must be achieved through continuing resistance to the forces that limit condition determine and too frequently oppress Examining the interrelationship between freedom possibility and imagination in American education Greene taps the fields of philosophy history educational theory and literature in order to discuss the many struggles that have characterized Americans' quests for freedom in the midst of what is conceived to be a free society Accounts of the lives of women immigrants and minority groups highlight the ways in which Americans have gone in search of openings in their lived situations learned to look at things as if they could be otherwise and taken action on what they found Greene presents a unique overview of American concepts and images of freedom from Jefferson's time to the present She examines the ways in which the disenfranchised have historically understood and acted on their freedom or lack of it in dealing with perceived and real obstacles to expression and empowerment Strong emphasis is placed on the focal role of the arts and art experience in releasing human imagination and enabling the young to reach toward their vision of the possible The author concludes with suggestions for approaches to teaching and learning that can provoke both educators and students to take initiatives to transcend limits and to pursue freedom not in solitude but in reciprocity with others not in privacy but in a public space

The Dialectics of Freedom Maxine Greene, **The Metaphysics of Freedom** Gregory Lynn Curl, 1971 [The Dialectics of Freedom in a Market Society](#) Robert Edwards Lane, 1979 **Dialectic** Roy Bhaskar, 2008-07-02 *Dialectic: The Pulse of Freedom* is now widely regarded as a classic of contemporary philosophy This book first published in 1993 sets itself three main aims the development of a general theory of dialectic of which Hegelian dialectic can be seen to be a special case the dialectical enrichment and deepening of critical realism viz into the system of dialectical critical realism and the outline of the elements of a totalizing critique of Western philosophy The first chapter clarifies the rational core of Hegelian dialectic Chapter 2 then proceeds to develop a general theory of dialectic Isolating the fallacy of ontological monovalence i.e. a purely positive account of being Roy Bhaskar then shows how absence and other negating concepts such as contradiction have a legitimate and necessary ontological employment He then goes on to give a synoptic account of key dialectical concepts such as the concrete universal to sketch the further dialectical development of critical naturalism through an account of what he calls four planar social being and following consideration of the dialectical critique of analytical reason he moves on to the real definition of dialectic as absencing absence and in the human sphere the axiology of freedom Chapter 3 extends and deepens critical realism's characteristic concerns with ontology science social science and emancipation not only into the realms of negativity and totality but also into the fields of reference and truth spatio-temporality tense and process the logic of

dialectical universalizability and on to the plane of ethics where it articulates a combination of moral realism and ethical naturalism whereby consideration of elemental desire involves commitment to the eudaimonistic society This is then followed in Chapter 4 by a sublime discussion of key moments in the trajectory of Western philosophy the tradition of which can now be seen to be based on what the author calls the unholy trinity of the epistemic fallacy or the reduction of being to knowledge primal squeeze or the collapse of structure and alethic truth and ontological monovalence
