human ills and endeavors to present a broad front to the pessimistic nihilism in therapeutics that has been too long current in these fields because the doctor's eyes have been too closely focused on the individual examples and results of human accidents. Neurology and psychiatry offer the widest possible opportunities for preventive medicine as well as for therapeutic optimism. The program here presented is essentially therapeutic. Planned as it has been on a broad scale, the more practical issues confronting the clinician have nevertheless been fully met. The editors have sacrificed philosophical views for more definite guideposts wherever in the present state of our knowledge such a course seemed wiser.
