A First Of Space Form Making:

Creating Sacred Places in First Century Corinth Alisha N. Paddock,2025-06-29 This book applies spatial theories from human and cultural geography to the archaeological remains of Ancient Corinth in order to consider how sacred places could have been created in the first century Building on Philip Sheldrake s theory among others the book defines sacred place as a space with significance Significance is found in the group s spiritual history their identity and the proper behaviours required to keep the group remaining a group The book further argues that if any of these elements of place are not recognized nor upheld the group risks becoming placeless *Space Syntax* Laura Vaughan,John Peponis,Ruth Conroy Dalton,2025-04-30 Professor Bill Hillier spent most of his career at The Bartlett University College London where he founded and developed with a team of colleagues an original research programme that set the study of architecture on a firm scientific basis His transformational way of thinking about buildings and cities influenced generations of scholars researchers and practitioners within the built environment disciplines and way beyond in fields ranging from archaeology and biology to physics and zoology *Space Syntax Selected papers* by Bill Hillier provides a canon of works that reflects the progression of Hillier s ideas from the early publications of the 1970s to his most recent work published before his death in 2019 This selection of influential works ranges from his papers on architecture as a professional and research discipline through to his later papers that present a theory of the spatial structure of the city and its social functions By bringing together writing from across his career span of half a century with specially commissioned introductions by a wide range of international experts in the field we are able to contextualise and show the range and evolution of Hillier s key ideas **Engineering Record, Building Record and Sanitary Engineer** ,1915 *The English Cyclopaedia: Cyclopaedia of arts and sciences* Charles Knight,1861 **Library of Universal Literature: First principles** ,1900 *The Household Encyclopaedia of Business and Social Forms Embracing the Laws of Etiquette and Good Society ...* James D. McCabe,1884 **The Penny Cyclopaedia of The Society for the Diffusion of Useful Knowledge** Society for the Diffusion of Useful Knowledge (Great Britain),1839 **Semiparallel Submanifolds in Space Forms** Ülo Lumiste,2009-03-02 Quite simply this book offers the most comprehensive survey to date of the theory of semiparallel submanifolds It begins with the necessary background material detailing symmetric and semisymmetric Riemannian manifolds smooth manifolds in space forms and parallel submanifolds The book then introduces semiparallel submanifolds and gives some characterizations for their class as well as several subclasses The coverage moves on to discuss the concept of main symmetric orbit and presents all known results concerning umbilic like main symmetric orbits With more than 40 published papers under his belt on the subject Lumiste provides readers with the most authoritative treatment **Official Gazette of the United States Patent and Trademark Office** ,1996 **Buildings and Building Management** Frank J.
