students and instructors Developmental Mathematics Julie Miller, Molly O'Neill, Nancy Hyde, 2023 Julie Miller Molly O'Neill and Nancy Hyde originally wrote their developmental math series because students were entering their College Algebra course underprepared The students were not mathematically mature enough to understand the concepts of math nor were they fully engaged with the material The authors began their developmental mathematics offerings with intermediate algebra to help bridge that gap This in turn developed into several series of textbooks from Prealgebra through Precalculus to help students at all levels before Calculus *Innovations in Developmental Math* Cecilia Le, Kimberly R. Rogers, Janet Santos, 2011 Nearly 60 percent of incoming community college students are unprepared for college level work and must take at least one pre college developmental course usually in math or English before enrolling in any credit bearing classes toward a degree Within developmental education students are most likely to need help with mathematics and students who enter community college needing to take developmental math fare the worst in terms of outcomes making this an issue that deeply affects students Lack of readiness for college math is as damaging as it is widespread Students are more likely to fail developmental mathematics than any other course in higher education according to the Carnegie Foundation for the Advancement of Teaching Thus it is not surprising that many students referred to developmental math choose to bypass such courses and services without knowing the detrimental consequences of this decision on their overall educational goals This brief looks at three community colleges that have made significant investments in programs to improve student success in developmental math These colleges are spotlighted for their implementation of the varied approaches to developmental math described above and for their ability to demonstrate outcomes for their students The community colleges featured in this brief are 1 Florence Darlington Technical College in South Carolina 2 Delaware County Community College in Pennsylvania and 3 Chaffey College in California Contains 4 tables and 11 endnotes **Developmental Mathematics, 3rd Edition** **Textbook-AIE** Hawkes Learning Systems, 2023-02-09 **Developmental Mathematics - 10 Week Access Card** Michael III Sullivan, Katherine Struve, Janet Mazzearella, 2016-06-27 This product is the 10 week access card for Developmental Mathematics Prealgebra Beginning Algebra and Intermediate Algebra 10 Week Standalone Access Card 1 e ALERT Before you purchase check with your instructor or review your course syllabus to ensure that you select the correct ISBN Several versions of Pearson's MyLab Mastering products exist for each title including customized versions for individual schools and registrations are not transferable In addition you may need a CourseID provided by your instructor to register for and use Pearson's MyLab Mastering products NOTE Make sure to use the dashes shown on the Access Card Code when entering the code The Sullivan Struve Mazzearella Algebra program is designed to motivate students to do the math at home or in the lab through a full suite of resources that support a variety of learning environments Instructors can choose the ideal combination of resources for their students The text is known for its two column example format that provides annotations to the left of the algebra These annotations explain what the authors are about to do in each step instead of what was just done just as an
