Devils Trill:

The Violinist, 1914 **Thresholds** Marcel Cobussen, 2008-01-01 In *Thresholds* Marcel Cobussen rethinks the relationship between music and spirituality. The book presents an idea of spirituality in and through music that counters strategies of exclusion and mastering of alterity and connects it to wandering, erring and roving. Cobussen regards spirituality as a non-concept that escapes categorization, classification and linguistic descriptions. Spirituality is a topological, non-discursive and a manifestation of otherness. And it is precisely music or better listening to music that induces these thoughts. By carefully encountering, analysing and evaluating certain examples from classical, jazz, pop and world music, it is possible to detach spirituality from concepts of otherworldliness and transcendentalism.

History of Crossroads in Early Modern Culture Bill Angus, 2022-01-05 Focusing on the crossroads in the early modern period, this book deals with the literature and history of the physical crossroads, its magical and religious encounters, rituals of transformation, binding of undesirable spirits, siting of gallows, associations with music and links to ancient cosmology. Physical crossroads have been culturally vital sites where forces human, demonic and divine were felt to converge. Crossroads have seemed to render the boundaries between these spheres negotiable, subject to certain artifice and timing. They gave access to gods and facilitated deals with devils; they were potent sites for rituals intended to influence lovers or harm enemies and provided both a dramatic stage for communal activities and a burial ground for the unwanted dead cast out in ceremonies of the night.

The Violin World, 1918 **Music and Fuzzy Logic** Hanns-Werner Heister, 2021-02-21 This book unfolds the manifold, complex and intertwined relations between Fuzzy Logic and music in a first comprehensive overview on this topic systematically as an outline as completely as possible in the aspects of Fuzzy Logic in this relation and especially in music as a process with three main phases, five anthropological layers and thirteen forms of existence of the artwork. Classics, Jazz, Pop, Folklore. Being concerned with the ontological, gnoseological, psychological and music-aesthetical status and the relative importance of different phenomena of relationship between music and Fuzzy Logic, the explication follows the four main principles with five phenotypes of Fuzzy Logic with respect to music: similarity, sharpening 1 as filtering, sharpening 2 as crystallization, blurring and variation. The book reports on years of author's research on topics that have been only little explored so far in the area of Music and Fuzzy Logic. It merges concepts of music analysis with fuzzy logical modes of thinking in a unique way that is expected to attract both specialists of music and specialists of Fuzzy Logic and also non-specialists in both fields. The book introduces the concept of dialectic between sharpening and conscious blurring. In turn, some important aspects of this dialectic are discussed, placing them in an historical dimension and ending in the postulation of a musical turn in the sciences with some important reflections concerning a Philosophy of Fuzzy Logic. Moreover, a production-oriented thinking is borrowed from fuzzy logic to musicology in this book, opening new perspectives in music and possibly also in other artistic fields.
