Dynamics Of Technical Controversy:

The Dynamics of Technical Controversy Allan Mazur,1981 **Strategies of Expertise in Technical Controversies**
Frederick Frankena,1992 This work discusses the development of wood for electric power in response to the energy crisis
Frankena studies the role and impact of technical expertise using an in depth case study and a comparative review of wood
fired power plant controversies in the United States Scientific Controversies H. Tristram Engelhardt, Jr.,Arthur L.
Caplan,1987-04-24 This collection of essays examines the ways in which disputes and controversies about the application of
scientific knowledge are resolved Four concrete examples of public controversy are considered in detail the efficacy of
Laetrile the classification of homosexuality as a disease the setting of safety standards in the workplace and the utility of
nuclear energy as a source of power The essays in this volume show that debates about these cases are not confined to
matters of empirical fact Rather as is seen with most scientific and technical controversies they focus on and are structured
by complex ethical economic and political interests Drs Engelhardt and Caplan have brought together a distinguished group
of scholars from the sciences and humanities who sketch a theory of scientific controversy and attempt to provide
recommendations about the ways in which both scientists and the public ought to seek more informed resolutions of highly
contentious issues in science and technology *Scientific Controversies* is offered as a contribution to the better understanding
of the roles of both science and nonscientific interests in disputes and controversies pertaining to science and technology
