architecture and engineering and horticulture that the discussions of general esthetics should have little specific reference to the problems of the landscape architect and that while there have been many books on special problems and special aspects of the field there should have appeared up to this time no book treating generally of landscape design adequate to the modern development of the subject and of the profession This book is not a compendium of useful information as to the practicalities of landscape construction though such a book is much needed nor is it primarily a book of pictures of completed work to which the designer may go to see how problems similar to his own have been met before It is emphatically not a book of rules which are supposed automatically to produce good design if religiously followed there are no such rules and no esthetic theory is final About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
