

POLITICAL SYSTEM

A **political system** is a way of organizing and governing a society. A **political system** sets up the framework for how people interact and make choices that affect everyone.

The goal of a **political system** is to create order, protect rights, and ensure that everyone has a say in shaping the society they live in.

Different **political systems** have different ways of doing this, like *democracies where people vote for their leaders* or *dictatorships where one person has all the power*.

Children In The Political System:

Children in the Political System David Easton, Jack Dennis, 1969 **Children and Work** Bernard Goldstein, Jack Oldham, What do children know about work careers and related topics What is the pattern of growth in values attitudes beliefs and knowledge Using quantitative and anecdotal evidence gathered from interviewing over 900 grade school students in five New Jersey communities the authors analyze childhood socialization to the concept of work Existing literature on this topic focuses on the critical years of occupational choice But Goldstein and Oldham strongly suggest that much of the child's work related development has already occurred prior to entry into secondary school and that career education must receive increased emphasis during the elementary years Their evidence corroborates the pattern of rapid progress toward childhood awareness of important social phenomena such as war politics race gender roles and economics By the seventh grade children have an awareness in these areas that approximates that of adults Traditional stereotypes concerning appropriate work roles for women continue to exist at the elementary school level This work is a comprehensive empirical treatment of childhood socialization to work fitting neatly into the growing body of literature on the socialization of the child into various political economic and social roles Children and Work is in the sociological tradition but the findings are presented in the context of a growing body of social science research on early socialization
