development administration as well as an appraisal of the problems associated with the application of these concepts in Third World nations Combining both theory and practice and providing concrete examples Hope begins by detailing the evolution of the concept of development from the inter war years through the 1950s when the expression Third World first emerged to the 1970s and the present when wholesale technology transfer and other new approaches emphasizing economic independence began to take precedence The chapters that follow chart the history of modern development administration focusing on important issues such as the role of the development administrator in the implementation of public policy the function of the public servant versus that of the politician bureaucracy in government and the increasing need for technical personnel to carry out development policies
