**Resources in Technical Communication** Cynthia Selfe, 2017-03-02 Provides the instructors of introductory technical communication courses with a set of resources for their classrooms

*Content Management* George Pullman, Gu Baotung, 2017-03-02 This collection of articles is the first attempt by academics and professional writers to delve into the world of content management systems The knowledge economy's greatest asset and primary problem is information management finding it validating it re purposing it keeping it current and keeping it safe In the last few years content management software has become as common as word processing software was five years ago But unlike word processors which are designed for single authorization and local storage content management systems are designed to accommodate large scale information production with many authors providing many different pieces of information kept in a web accessible database any piece of which might find its way into electronic documents that the author doesn't even know exist These software systems are complex to say the least and their impact on the field of writing will be immense

[Solving Problems in Technical Communication](#) Johndan Johnson-Eilola, Stuart A. Selber, 2024-05-31 The field of technical communication is rapidly expanding in both the academic world and the private sector yet a problematic divide remains between theory and practice Here Stuart A Selber and Johndan Johnson Eilola both respected scholars and teachers of technical communication effectively bridge that gap *Solving Problems in Technical Communication* collects the

latest research and theory in the field and applies it to real world problems faced by practitioners problems involving ethics intercultural communication new media and other areas that determine the boundaries of the discipline The book is structured in four parts offering an overview of the field situating it historically and culturally reviewing various theoretical approaches to technical communication and examining how the field can be advanced by drawing on diverse perspectives Timely informed and practical Solving Problems in Technical Communication will be an essential tool for undergraduates and graduate students as they begin the transition from classroom to career *Computer Games and Technical Communication* Jennifer deWinter, Ryan M. Moeller, 2016-05-23 Taking as its point of departure the fundamental observation that games are both technical and symbolic this collection investigates the multiple intersections between the study of computer games and the discipline of technical and professional writing Divided into five parts Computer Games and Technical Communication engages with questions related to workplace communities and gamic simulations industry documentation manuals gameplay and ethics training testing and number crunching and the work of games and gamifying work In that computer games rely on a complex combination of written verbal visual algorithmic audio and kinesthetic means to convey information technical and professional writing scholars are uniquely poised to investigate the intersection between the technical and symbolic aspects of the computer game complex The contributors to this volume bring to bear the analytic tools of the field to interpret the roles of communication production and consumption in this increasingly ubiquitous technical and symbolic medium

**Deadly Documents** Mark Ward, 2016-12-05 Scholars teachers and practitioners of organizational professional and technical communication and rhetoric are target audiences for a new book that reaches across those disciplines to explore the dynamics of the Holocaust More than a history the book uses the extreme case of the Final Solution to illumine the communicative constitution of organizations and to break new ground on destructive organizational communication and ethics *Deadly Documents Technical Communication Organizational Discourse and the Holocaust Lessons from the Rhetorical Work of Everyday Texts* starts with a microcosmic look at a single Nazi bureau Through close rhetorical visual and discursive analyses of organizational and technical documents produced by the SS Security Police Technical Matters Group the bureau that managed the Nazi mobile gas van program author Mark Ward shows how everyday texts functioned as boundary objects on which competing organizational interests could project their own interpretations and temporarily negotiate consensus for their parts in the Final Solution The initial chapters of *Deadly Documents* provide a historical ethnography of the SS technical bureau by closely describing the institutional and organizational cultures in which it operated and relating organizational stories told in postwar testimony by the desk murderers themselves Then through examination of the primary material of their documents Ward demonstrates how this Social Darwinist world of competing Nazi bureaucrats deployed rhetorical and linguistic resources to construct a social reality that normalized genocide Ward goes beyond the usual Weberian bureaucratic paradigm and applies to the problem of the Holocaust both the interpretive view that sees

organizations as socially constructed through communication and the postmodern view that denies the notion of a preexisting social object called an organization and instead situates it within larger discourses The concluding chapters trace how contemporary scholars of professional communication have wrestled with the Nazi case and developed a consensus explanation that the desk murderers were amoral technocrats Though the explanation is dismissed by most historians it nevertheless offers Ward argues a comforting distance between us and them Yet as Ward writes First we will learn more about the dynamic role of everyday texts in organizational processes Second as we see these processes perhaps inherent to all organized communities including our own at work even in the extreme case of the SS Technical Matters Group the comforting distance that we now maintain between them and us is necessarily diminished And third our newfound discomfort may open productive spaces to revisit conventional wisdoms about the ethics of technical and organizational communication

*Connecting People with Technology* George Hayhoe, Helen Grady, 2020-11-25 This book explores five important areas where technology affects society and suggests ways in which human communication can facilitate the use of that technology Usability has become a foundational discipline in technical and professional communication that grows out of our rhetorical roots which emphasize purpose and audience As our appreciation of audience has grown beyond engineers and scientists to lay users of technology our appreciation of the diversity of those audiences in terms of age geography and other factors has similarly expanded We are also coming to grips with what Thomas Friedman calls the flat world a paradigm that influences how we communicate with members of other cultures and speakers of other languages And because most of the flatteners are either technologies themselves or technology driven technical and professional communicators need to leverage these technologies to serve global audiences Similarly we are inundated with information about world crises involving health and safety issues These crises are driven by the effects of terrorism the aging population HIV AIDS and both human made and natural disasters These issues are becoming more visible because they are literally matters of life and death Furthermore they are of special concern to audiences that technical and professional communicators have little experience targeting the shapers of public policy seniors adolescents and those affected by disaster Biotechnology is another area that has provided new roles for technical and professional communicators We are only beginning to understand how to communicate the science accurately without either deceiving or panicking our audience We need to develop a more sophisticated understanding of how communication can shape reactions to biotechnology developments Confronting this complex network of issues we re challenged to fashion both our message and the audience s perceptions ethically Finally today s corporate environment is being shaped by technology and the global nature of business Technical and professional communicators can play a role in capturing and managing knowledge in using technology effectively in the virtual workplace and in understanding how language shapes organizational culture

**Rethinking Post-Communist Rhetoric** Kirk St. Amant,, Pavel Zemliansky, 2016-04-08 This collection examines the forces and factors affecting rhetoric writing and communication

expectations in the nations of the former Soviet Union and the Eastern Bloc The entries in this collection focus on four interconnected topics or contexts influencing rhetorical expectations and writing practices in these countries The four contexts are 1 the dynamics of the educational settings in which students learn about the relationships between rhetoric and writing 2 the professional environments in which students will apply their knowledge of rhetoric and writing upon completing their formal studies 3 the greater global context that affects the teaching of rhetoric and writing as connected to educational institutions becoming part of a larger and more integrated global community and 4 the factors and perceptions that affect how students apply and or expand their foundations in rhetoric and writing to communicate effectively across different forms of media By approaching ideas of rhetoric writing and communication from the perspective of these four areas this collection provides readers with a broad foundation for understanding the various overarching and interlocking contexts that affect perceptions of and practices involving communication practices and expectations in the former Eastern Bloc Additionally this approach provides researchers teachers and students with ideas and approaches that can be used to more effectively engage both with this topic area and with individuals from these nations
