Contested Environments Nick Bingham, Andrew Blowers, Chris Belshaw, 2003-07-09 Why are food scares become so common Whose voices count in decisions affecting the landscapes where we live Will we soon be wars over water What makes people protest outside international trade meetings These are just a few of the questions that are explored in *Contested Environments* By bringing together perspectives from science social science technology and humanities the book addresses in a uniquely interdisciplinary way why environmental issues are so often controversial Other features include the detailed examination of a wide range of topics from specific disputes such as those around GM crops national parks energy policy water supply and international trade to broader debates like environmental justice economic valuation of environments and the media the promotion of integrative thinking through the book wide use of the concepts of value power and action the inclusion of frequent activities to encourage readers to develop both their appreciation of particular issues and generic skills the rich illustration of the text with examples from around the world The book is part of a series entitled *Environment Change Contest and Response* The series forms a significant part of an interdisciplinary Open University course on environmental matters The other books in the series are *Understanding Environmental Issues* *Changing Environments* *Environmental Responses* *Navigating Public Security in the Age of Post-Truth: Challenges and Implications* Ağırdil, Onur, Ayhan, Ufuk, 2026-03-11 In an era increasingly defined by post truth politics public security is no longer shaped solely by physical threats but by the contested terrain of information itself Misinformation disinformation and the lack of trust in traditional authorities complicate how societies identify risks and maintain social cohesion Today narratives with emotional appeal often outweigh factual accuracy *Navigating public security in the age of post truth* requires rethinking knowledge communication and understanding the profound implications this shift holds for civil liberties and collective resilience *Navigating Public Security in the Age of Post Truth Challenges and Implications* explores how the erosion of truth poses serious threats to social cohesion and democratic resilience It examines the post truth phenomenon and its implications for public security in the 21st century Covering topics such as public security news and misinformation this book is an excellent resource for academics researchers policymakers security professionals government institutions and graduate students

Naval Logistics Challenges Sabine Lorca, AI, 2025-03-12 *Naval Logistics Challenges* highlights the critical role of logistics in maintaining modern naval fleets particularly focusing on frigate maintenance and supply chain management The book examines how efficient and resilient supply chains are vital for operational readiness comparing the U S Navy's approach with those of key European navies Readers gain insights into maritime strategy and the importance of resource allocation essential for understanding naval power projection A key takeaway is that naval strength depends not just on the number of ships but also on the sophistication of logistical support The book progresses from an overview of naval logistics principles to a detailed analysis of the U S Navy's systems then explores European naval logistics drawing from diverse sources Specific

chapters address defense spending's impact and the role of technology. By comparing different logistical models, the book offers valuable insights for policymakers, naval strategists, and defense contractors aiming to enhance naval logistics systems and address ongoing debates in defense procurement.

Environmental Risk Planning and Management Simon Gerrard, R. Kerry Turner, Ian Bateman, 2001. The assessment and management of risks to human health and the environment has become a topic of increasing importance and presents one of the major challenges to modern society. This comprehensive volume draws together key papers from a range of different perspectives and offers the reader an important insight into the basic principles of environmental risk management. Topics include the background to environmental risk, human health and ecological risk assessment, risk perception and communication, strategic issues in corporate environmental risk and environmental risk and siting hazardous facilities.

Changing Environments Dick Morris, 2003-04-11. Are we humans destroying the environments in which we live or is environmental change inevitable and natural? How has the relationship between human societies and environments changed since pre-history? Will human population growth outpace the available resources of land and water? Is global warming and climate change already out of control? What can economic and political models tell us about international development? *Changing Environments* takes a broad interdisciplinary approach to such questions, drawing on ideas from science, technology, social science, and humanities to examine how and why environments change as a result of natural and human-mediated processes. It draws on examples from around the world and includes consideration of the scales of time and space over which changes in our environments occur, the effects on environments that arise from human use of the resources of energy, land, water, and the atmosphere, the role of technology and economics in shaping human actions on our environments, the use and limitations of different models for thinking about environmental change. The book is part of a series entitled *Environment Change: Contest and Response* that forms a large part of an Open University course on environmental matters. The other books in the series are *Understanding Environmental Issues*, *Contested Environments*, and *Environmental Responses*.

Environment & Planning, 2010. *Understanding Environmental Issues* Steve Hinchliffe, Andrew Blowers, Joanna R. Freeland, 2003-03-24. *Understanding Environmental Issues* asks what is meant by the term environment, why are environmental questions so pressing, and how can we make sense of environmental issues. The book begins with an investigation of an estuary and touches upon the issues of sea level change, overfishing, nuclear waste disposal, and management of biodiversity. Subsequent chapters take the topic of species extinction to introduce the concepts of time, space, values, power, action, and risk uncertainty. Part of the OU Wiley Environment Series.
