

# B.F. SKINNER'S OPERANT CONDITIONING

Behaviour modification through Reinforcement and Punishment

## Positive Reinforcement

Involves presenting a pleasant stimulus after a desired behaviour, increasing the likelihood that the behaviour will occur again. For example, giving a child praise for cleaning their room reinforces that positive behaviour.

## Negative Reinforcement

Involves removing an unpleasant stimulus when a desired behavior occurs, thereby increasing the likelihood of that behaviour. An example is taking away a child's extra chores when they complete their homework on time.

## Positive Punishment

Involves administering an unpleasant stimulus to decrease a behaviour. For example, scolding a child for drawing on the walls aims to reduce that behaviour.

## Negative Punishment

Involves taking away a pleasant stimulus to decrease a behaviour. An example is removing a teenager's gaming privileges when they miss their curfew.

## Extinction

Involves the gradual weakening of a behaviour by stopping reinforcement or punishment. Over time, the behaviour decreases. For example, ignoring a child's tantrums may ultimately reduce their frequency.
