

Introduction

- Computer-integrated manufacturing (CIM) refers to the use of computer-controlled machineries and automation systems in manufacturing products.
- CIM combines various technologies like computer-aided design (CAD) and computer-aided manufacturing (CAM) to provide an error-free manufacturing process that reduces manual labor and automates repetitive tasks.
- CIM is not a product that can be purchased and installed. It is a way of thinking and solving problems
- The CIM approach increases the speed of the manufacturing process and uses real-time sensors and closed-loop control processes to automate the manufacturing process.
- It is widely used in the automotive, aviation, space and ship-building industries.
