Algebraic Thinking:

Fostering Algebraic Thinking Mark J. Driscoll, 1999 Fostering Algebraic Thinking is a timely and welcome resource for middle and high school teachers hoping to ease their students transition to algebra *Lessons for Algebraic Thinking* Ann Lawrence, Charlie Hennessy, 2002 These lessons show how to maximize instruction that prepares students for formal algebra Through a series of investigations students build their proficiency with key algebraic concepts Connections between arithmetic and algebra are made through the use of drawings tables graphs words and symbols Lessons include a technology component with suggestions for teaching with graphing calculators **Developing Thinking in Algebra** John Mason, Alan Graham, Sue Johnston-Wilder, 2005-04-23 This book has been constructed in a way that will enable teachers and their support staff to experience and to teach algebraic thinking to pupils aged 7 16 Algebra and Algebraic Thinking in School Mathematics Carole E. Greenes, 2008 Examines the status of algebra in our schools and the changes that the curriculum has undergone over the past several years Includes successful classroom practises for developing algebraic reasoning abilities and improving overall understanding **Lessons for Algebraic Thinking** Maryann Wickett, Katharine Kharas, Marilyn Burns, 2002 Lessons for K 8 teachers on making algebra an integral part of their mathematics instruction **Teaching and Learning Algebraic Thinking with 5- to 12-Year-Olds** Carolyn Kieran, 2017-12-04 This book highlights new developments in the teaching and learning of algebraic thinking with 5 to 12 year olds Based on empirical findings gathered in several countries on five continents it provides a wealth of best practices for teaching early algebra Building on the work of the ICME 13 International Congress on Mathematical Education Topic Study Group 10 on Early Algebra well known authors such as Luis Radford John Mason Maria Blanton Deborah Schifter and Max Stephens as well as younger scholars from Asia Europe South Africa the Americas Australia and New Zealand present novel theoretical perspectives and their latest findings The book is divided into three parts that focus on i epistemological mathematical aspects of algebraic thinking ii learning and iii teaching and teacher development Some of the main threads running through the book are the various ways in which structures can express themselves in children s developing algebraic thinking the roles of generalization and natural language and the emergence of symbolism Presenting vital new data from international contexts the book provides additional support for the position that essential ways of thinking algebraically need to be intentionally fostered in instruction from the earliest grades Lessons for Algebraic Thinking Leyani Von Rotz, Marilyn Burns, 2002 The lessons in this book introduce basic algebraic concepts to students in the primary grades Manipulative materials problem solving investigations games and real world and imaginary contexts support arithmetic learning while introducing ideas basic to algebra including patterns equivalence and graphing **How Students Think When Doing Algebra** Steve Rhine, Rachel Harrington, Colin Starr, 2018-10-31 This book bridges research and practice to help teachers understand students algebraic thinking It covers five domains tied to CCSS topics and aims to accelerate early career teachers experience with student misconceptions and

struggles The book is a valuable resource for both new and veteran math teachers **Connecting Arithmetic to Algebra** Susan Jo Russell, Deborah Schifter, Virginia Bastable, 2011 To truly engage in mathematics is to become curious and intrigued about regularities and patterns then describe and explain them A focus on the behavior of the operations allows students starting in the familiar territory of number and computation to progress to true engagement in the discipline of mathematics Susan Jo Russell Deborah Schifter and Virginia Bastable Algebra readiness it s a topic of concern that seems to pervade every school district How can we better prepare elementary students for algebra More importantly how can we help all children not just those who excel in math become ready for later instruction The answer lies not in additional content but in developing a way of thinking about the mathematics that underlies both arithmetic and algebra Connecting Arithmetic to Algebra invites readers to learn about a crucial component of algebraic thinking investigating the behavior of the operations Nationally known math educators Susan Jo Russell Deborah Schifter and Virginia Bastable and a group of collaborating teachers describe how elementary teachers can shape their instruction so that students learn to notice and describe consistencies across problems articulate generalizations about the behavior of the operations develop mathematical arguments based on representations to explain why such generalizations are or are not true Through such work students become familiar with properties and general rules that underlie computational strategies including those that form the basis of strategies used in algebra strengthening their understanding of grade level content and at the same time preparing them for future studies Each chapter is illustrated by lively episodes drawn from the classrooms of collaborating teachers in a wide range of settings These provide examples of posing problems engaging students in productive discussion using representations to develop mathematical arguments and supporting both students with a wide range of learning profiles Staff Developers Available online the Course Facilitator s Guide provides math leaders with tools and resources for implementing a Connecting Arithmetic to Algebra workshop or preservice course For information on the PD course offered through Mount Holyoke College download the flyer *Algebra and the Elementary Classroom* Maria L. a schoolwide initiative No matter what your math background is Algebra and the Elementary Classroom offers strong support for integrating algebraic thinking into your daily teaching Its clear descriptions show you what algebraic thinking is and how to teach it Its sample problems deepen your own algebraic thinking Best of all it gives you ideas for grade specific instructional planning Read Algebra and the Elementary Classroom and prepare your students for a lifetime of mathematical understanding **EMPower Math, Seeking Patterns, Building Rules: Algebraic Thinking, Student Edition**
