Alien Planet:

Life on an Alien Planet: Pathological Demand Avoidance Katie Stott, 2019-09-03 Katie Stott's vivid and honest account provides a compelling insight into Pathological Demand Avoidance (PDA). The book follows the journey of her son Fraser and the sudden change that occurred in him when starting primary school aged just four. Katie recounts the difficulty both she and the school staff had understanding Fraser's extreme behaviours until he was diagnosed with Asperger syndrome and PDA. Full of useful advice and observations, Katie provides a detailed account of the PDA-specific behaviours in Fraser and how she learnt to lessen the impact of these by focusing on the cause: anxiety and a need for control rather than the effect. Katie explains with clarity how Fraser's sensory issues also contributed to his every-day challenges at school as he became increasingly isolated from his classmates and faced risk of expulsion when the school became unable to cope. The book goes on to explore Katie's fight to gain recognition of PDA in school and despite significant obstacles the way she eventually managed to secure an Education Health and Care Plan (EHCP) and a specialist school so that Fraser could learn, make friends and thrive once again. Packed with advice, it also provides an invaluable reference on how to ensure PDA children get the support they need and the options available to special educational needs (SEN) children who are struggling in the mainstream school environment. A detailed resource for parents and families of children with PDA along with teachers, SENCOs and those who work alongside children in the education system.

Foundations for Metasemantics Daniel Cohnitz, Jussi Haukioja, 2025-07-02 Metasemantics studies the foundations of meaning, asking what makes it the case that certain words have the meanings that they do. But what makes metasemantic theories true? This question has been all but ignored in philosophy of language. In this book, Cohnitz and Haukioja address this issue and argue that just as in metasemantics, both internalist and externalist answers are available for this foundational question. The authors introduce and defend meta-internalism, arguing that the foundations of reference and meaning are anchored in the individual dispositions and psychological states of language users, offering an alternative to meta-externalist views that would appeal to broader community-based or otherwise external factors. Meta-internalism is moreover compatible with semantic externalism as usually understood and provides an explanation of why externalism is true. Through a critical examination of prominent theories and thought experiments, the book explores fundamental issues like reference failure, conceptual engineering, and the metaphysical implications of reference, as well as the methodology of theories of reference. With its focus on the foundations of metasemantics, the book provides a fresh and empirically informed perspective on one of the core questions in the philosophy of language. *Foundations for Metasemantics* is essential reading for philosophers, scholars, and students seeking to understand the underlying principles that support our theories of meaning and reference.

THE SELF-INTRODUCTION OF ZHANG XIANG QIAN Zhang Xiang Qian, 2025-04-04 Zhang Xiang Qian's *Self Introduction* tells of a Chinese farmer taken to an alien planet in 1985. It details his efforts to promote field scanning tech and insights into

hugely compelling The New York Times Book Review How carbon dioxide made planet Earth shaped human history and now
holds our future in the balance Every year we are dangerously warping the climate by putting gigantic amounts of carbon
dioxide into the air But CO2 isn t merely the by product of burning fossil fuels it is also fundamental to how our planet works
All life is ultimately made from CO2 and it has kept Earth bizarrely habitable for hundreds of millions of years In short it is
the most important substance on Earth But how is it that CO2 is as essential to life on Earth as it is capable of destroying it
In The Story of CO2 Is the Story of Everything award winning science journalist Peter Brannen reveals how carbon dioxide s
movement through rocks air water and life has kept our planet s climate livable its air breathable and its oceans hospitable to
complex life Starting at the dawn of life almost 4 billion years ago and working all the way up through today s global climate
crisis and beyond he illuminates how CO2 has been responsible for the planet s many deaths and rebirths for shaping the
evolution of life and for the development of modern human society And he argues that it s only by reckoning with this
planetary scale history that we can understand the cosmic stakes of our current moment on Earth and how dangerous our
experiment with the climate really is Drawing on groundbreaking research and with a clear eyed perspective Brannen shows
how a deep exploration of the carbon cycle can shed light on the way forward for humanity as we try to avert environmental

catastrophe in the future And it all begins with a richer understanding of the critical role of CO₂ in our world How has a single substance dictated our planet s fate for billions of years and what does its deep history tell us about our own survival

The Planetary Thermostat Follow the epic journey of carbon through rocks air water and life and learn how this delicate cycle has kept Earth habitable for eons and why our interference is so dangerous A 4 Billion Year Biography Travel from the dawn of life through Snowball Earth and the age of dinosaurs to see how CO₂ has repeatedly remade the world driving both creation and catastrophe The Rise of a New Metabolism Uncover how the Industrial Revolution began a radical new experiment unleashing hundreds of millions of years of stored sunlight from fossil fuels and reshaping the planet in centuries Lessons from Paleoclimatology See how groundbreaking research into Earth s past climates provides a crucial and alarming roadmap for understanding the consequences of our current moment
