responses for these root causes are available to the international community. The responses are examined on the basis of international law in particular human rights law and within the concept of human security with the goal of fostering a long term reduction in political violence. Drawing on existing political discussions and research about the root causes of terrorism Zwitter develops a legal framework for the application of legal terrorism prevention tools. This study serves as a framework of action and analysis using concepts and particularly legal frameworks which are already broadly or universally recognized to increase the applicability of the framework without having to invent new legal regimes. In doing so it makes use of the concept of human security for tackling breeding grounds and other facilitators of terrorism making it universally accessible. Secondly it offers recommendations for policy makers and practitioners seeking to improve the effectiveness of countering violent extremism program design implementation and evaluation. A gender analysis framework is built across the chapters drawing from various feminist analytical perspectives used in International Relations theory. Negotiating Hostage Crises with the New Terrorists Adam Dolnik, Keith M. Fitzgerald, 2007-11-30 This book is about the role of negotiation in resolving terrorist barricade hostage crises What lessons can be learned from past deadly incidents so that crisis negotiators and decision makers can act with greater effectiveness in the future What are the lessons the terrorists are learning and how will they affect the dynamics of future incidents What can we learn about the terrorist threat and about preventing the escalation of future terrorist hostage taking situations While there are many trained crisis negotiators around the world almost none of them has ever had contact with a terrorist hostage taking incident Further the entire training program of most hostage negotiators focuses on resolving crises that do not take into consideration issues such as ideology religion or the differing sets of strategic objectives and mindsets of ideological

hostage takers This is especially true with regard to the terrorists of the new breed who have become less discriminate more lethal and more willing to execute hostages and die during the incident Further many of the paradigms and presumptions upon which the contemporary practice of crisis negotiation is based do not reflect the reality of the new terrorists The main focus of this book is on the detailed reconstruction and analysis of the two most high profile cases in recent years the Moscow theater and the Beslan school hostage crises with a clear purpose of drawing lessons for hostage negotiation strategies in the future This is an issue of top priority Terrorist manuals from countries such as Saudi Arabia and Iraq reveal that terrorist organizations are very closely observing and analyzing the lessons learned from these two incidents suggesting that we are likely to see this type of new terrorist hostage taking involving large numbers of suicide fighters and executions of hostages at some point in the future This raises a wide array of questions about appropriate responses and negotiation strategies From the first glance it is clear that we are not prepared
