Country Connection:

The Cross-Border Connection Roger Waldinger, 2015-01-05 International migration presents the human face of globalization Roger Waldinger addresses a paradox at its core emigrants departing one society become immigrants in another tying those two societies together He explains how interconnections between place of origin and destination are built and maintained and why they eventually fall apart

Central Banks in Organizational Networks Christoph F-D. Wu, 2022-07-13 This inter disciplinary and wide ranging study unravels the social processes of decision making at the interface of central banks and financial market participants and thereby raises important questions about responsible central bank governance and its obligations to stakeholders in society The book challenges commonly held assumptions on how central banking works and critically assesses unconventional monetary policy and its underlying theoretical tenets Drawing from rich multi sided fieldwork and data collection this research monograph offers an in depth look into the financial market practices around the quantitative easing programmes of the European Central Bank and focuses on the uneasy role of modern central banks as active market participants The author introduces concepts from social network theory and develops a novel method to study organisational networks in the context of financial markets An analysis of the European Central Bank s social organisational and financial networks is sketched over the course of multiple chapters The concluding chapters dive into documentary analysis and the extensive material from qualitative interviews with senior investment professionals about the strategies and adaptive processes around the lived experience of quantitative easing The winner of the British Sociological Association s prestigious Philip Abrams Memorial Prize this book is a vital resource for social scientists researching organisations in financial markets providing theory concepts empirical data and practical implications It will be of interest to academics and graduate students in economics sociology and management organisation studies as well as practitioners at central banks and in asset management
