Democratic Commitments:

Democratic Commitments Lisa L. Martin, 2000-04-17 From the refusal of the U S Congress to approve fast track trade authority and certain foreign aid packages to the obstacles placed by Western European parliaments in the path of economic integration legislatures often interfere with national leaders efforts to reach and implement predictable international agreements This seems to give an advantage to dictators who can bluff with confidence and make decisions without consultation and many assume that even democratic governments would do better to minimize political dissent and speak foreign policy from a single mouth In this thoughtful empirically grounded challenge to the assumption that messy domestic politics undermine democracies ability to conduct international relations Lisa Martin argues that legislatures and particularly the apparently problematic openness of their proceedings actually serve foreign policy well by giving credibility to the international commitments that are made Examining the American cases of economic sanctions the use of executive agreements versus treaties and food assistance in addition to the establishment of the European Union Martin concludes that if institutionalized even rancorous domestic conversations between executives and legislatures augment rather than impede states international dealings Such interactions strengthen and legitimize states bargaining positions and international commitments increasing their capacity to realize international cooperation By expanding our comprehension of how domestic politics affect international dialogue this work is a major advance in the field of international relations and critical reading for those who study or forge foreign policy

Roads to Regionalism Tanja A. Börzel, Lukas Goltermann, Kai Striebinger, 2016-04-08 Over the past few decades states all around the globe have intensified institutionalized cooperation at the regional level To deepen our understanding of state led regionalism the authors use an analytical framework comprising four main strands First they describe and explain the genesis and growth of regional organizations Second they account for institutional design looking at important similarities and differences Third they examine the interaction between organizations and member states in an attempt to reveal factors that shape the level of commitment to and compliance with regional initiatives Finally they consider the impact of regional organizations on their member states They conclude by providing a foundation for future research on the dynamic development of regionalism

The Good Representative Suzanne Dovi, 2012-06-18 In The Good Representative Suzanne Dovi argues that democratic citizens should assess their representatives by their display of three virtues they must be fair minded build critical trust and be good gatekeepers This important book provides standards for evaluating the democratic credentials of representatives Identifies the problems with and obstacles to good democratic representation Argues that democratic representation even good democratic representation is not always desirable Timely and original this book rejects the tendency to equate respect for the preferences of citizens with neutrality on the standards used in choosing their representatives

The Europeanisation of Parliamentary Democracy Katrin Auel, Arthur Benz, 2006-05-04

This groundbreaking new study shows how the process of creating an ever closer European Union affects not only the policy making but also the politics and polity of the Member States Empirical studies on the domestic impact of Europe identified different forms of Europeanization due to alternative mechanisms of internalising the new norms and rules Although many studies have since focused on the question of how to what degree in what direction at what pace and at what point of time Europe matters the Europeanization of one particular structural determinant of the Member States namely the system of parliamentary democracy is still under researched This is all the more astonishing as democracy in the EU depends to a large extent on the democratic legitimacy of procedures at the national level This volume addresses the key issue of the Europeanisation of parliamentary systems and thus contributes to the ongoing debate on the parliamentary dimension of the European Union It brings together theoretical concepts as well as cross national empirical research on the Europeanization of the member states parliamentary systems focussing on different elements such as structures procedures and decision making processes as well as on the question how parliamentarians as actors react to these changes and actively shape this Europeanization This book was previously published as a special issue of The Journal of Legislative Studies

Randolph Bourne and the Politics of Cultural Radicalism Leslie J. Vaughan, 1997 Reassesses the short life and career of American essayist critic and founder of cultural radicalism Bourne 1886 1918 known today mostly for his opposition to US military involvement in Europe and warnings about the military industrial complex Vaughan political science U of Minnesota Duluth argues that his stance from outside establishment perspectives was not a retreat from politics as many have claimed but a form of political engagement free from the suppositions that impede genuine debate and democratic change Annotation copyrighted by Book News Inc Portland OR

The Challenge of Diversity Rainer Bauböck, Agnes Heller, 1996 Immigration from diverse origins has not only changed the social composition of highly industrialized societies It has also profoundly affected their cultural identities Nations

originating from immigration such as the USA Australia or Israel have reluctantly abandoned the vision of a melting pot wherein all ethnic origins would be transformed into a homogeneous national identity But will common citizenship be sufficient to integrate an ethnic mosaic Many European societies have traditionally identified the political nation with specific ethnic traditions How much cultural adaptation can they expect from immigrants and how open are their national cultures for accommodating the immigrant experience Ten authors address these questions There is a common denominator Cultural diversity resulting from immigration is neither seen as inherently desirable nor as a problem to be overcome but rather as a challenge to which liberal democracies have not yet responded adequately **Henry Adams** James P. Young, 2001 In this revisionist study Young denies that Adams was a reactionary critic of democracy and instead contends that he was an idealistic though often disappointed advocate of representative government Young focuses on Adams's belief that capitalist industrial development during the Gilded Age had debased American ideals and then turns to a careful study of Adams's famous contrast of the unity of medieval society with the fragmentation of modern technological society **BOOK JACKET**

The Learning of Liberty Lorraine Smith Pangle, Thomas L. Pangle, 1993 This very important book is original sweeping and wise about the relation between education and liberal democracy in the United States The Pangles reconsider superior ideas from the founding period in a way that illuminates any serious thinking on American education whether policy oriented or historical American Political Science Review An important and thoughtful book stimulating for citizens as well as scholars Journal of American History **The Social Democrat**, 1901 **Citizenship and Democratic Doubt** Bob Pepperman

Taylor, 2004 Much of the world today views America as an imperialist nation bent on global military economic and cultural domination At home few share this negative view Bob Pepperman Taylor however argues that US moral self righteousness may potentially imperil democratic ideals and threaten democracy Beyond Neoliberalism in Latin America? John Burdick, Philip Oxhorn, Kenneth M. Roberts, 2009 While the neoliberal model continues to dominate economic and political life in Latin America people throughout the region have begun to strategize about how to move beyond this model What are the alternatives they imagine Do these alternatives represent a genuine break Twelve cutting edge papers investigate how Latin Americans are struggling to articulate a future in which neoliberalism is reconfigured **Populism, Its Rise and Fall** William Alfred Pfeffer, 1992 Pfeffer's memoir describes the development of Populism the political maneuverings and campaign practices of the People's Party the effect of the famous silver movement on the critical election of 1896 and the behind the scenes conflict that ultimately led to the dissolution of America's last great third party Official Records, 1946

Deliberative Democracy and the Plural Polity Michael Rabinder James, 2004 In this pathbreaking work the author integrates questions of justice and stability through a model of deliberative democracy in the plural polity *Deliberative Democracy and the Plural Polity* provides a realistic but critical reform agenda that can animate struggles for justice in an enormously diverse world **The Democrat**, 1920 **The United States and Latin American Democracy** Abraham F.
