Methods and Tools for Compiler Construction B. Lorho, 1984 For a long time compiler construction was considered an operation to be carried out by only a few skilled specialists However over the past decade numerous theoretical advances have led to a methodology of compiler writing as well as to tools for automatic and semi automatic compiler construction This book is the result of an advanced course sponsored by the Commission of the European Communities and the Institut National de Recherche en Informatique et en Automatique The course Methods and Tools for Compiler Construction was held in Rocquencourt in December 1983 The volume places its emphasis on specific areas where significant improvements have been made including attribute grammars compilation from semantic definitions code generation and optimization and Ada compiling

Compiler Construction K.V.N. Sunitha, 2013 Designed for an introductory course this text encapsulates the topics essential for a freshman course on compilers The book provides a balanced coverage of both theoretical and practical aspects The text helps the readers understand the process of compilation and proceeds to explain the design and construction of compilers in detail The concepts are supported by a good number of compelling examples and exercises
