

# COUNTRY CLIMATE & DEVELOPMENT REPORTS *IN NUMBERS*

**24** Number of countries covered by CCCRs published or in press

**34/100** Share of global population covered by the first batch of CCCRs

**34%**

Share of global CO<sub>2</sub> emissions covered by the first batch of CCCRs

## ADAPTATION

**13%  
-  
28%**

Reduction in water availability in top in 2050 because of climate change

**Up to 6.2%**

Agricultural losses in Vietnam by 2030 compared to 2000 levels as opposed to a scenario without climate change where agricultural output is estimated to increase by 20% from 2000 to 2030

**2%  
-  
5%**

GDP gains in 2050 thanks to adaptation options explored in the Sahel CCCRs

**13.5 million** Additional people in extreme poverty in the Sahel in 2050 because of climate impacts

## MITIGATION

**70%**

CO<sub>2</sub> emissions reductions in 2050 in the low-carbon development scenarios of CCCRs

**75%**

Share of renewable energy in power systems in 2040 in the low-carbon development scenarios of CCCRs

**-0.1%  
to  
+3.3%**

Impact on GDP in 2050 from a shift to low-carbon development

Annual investment needs coverage about

**1.4%** of GDP

over 2002-2030 across all the CCCR countries analyzed so far to shift to low-carbon, resilient development, but in lower-income countries, this often exceeds

**5%** of GDP

and can be as high as

**8%** of GDP

# Climate And Development

**William Basil Worsfold**

## **Climate And Development:**

The Big Push for Transformation Through Climate and Development World Bank, International Monetary Fund, London School of Economics and Political Science, Brookings Institution, 2023-02-28 The High Level Advisory Group HLAG on Sustainable and Inclusive Recovery and Growth came together to provide policy analysis and practical proposals for actions that could help countries secure a strong recovery from the pandemic and a successful green transition This report pulls together key findings from the deliberations and provides actionable recommendations to support a pathway to green resilient and inclusive development GRID The HLAG started by assessing the scale and nature of investment and financing challenges It was immediately clear that investment needs require rapid and sustained scaling up conservative estimates presented to the HLAG by Bhattacharya et al 2022 suggest that EMDEs other than China have aggregate investment and development spending needs on the order of at least 1 3 trillion per year by 2025 and 3 5 trillion per year by 2030

Policy-Driven Climate and Development Finance Mahmoud Mohieldin, 2026-01-15 Climate finance is the key to tackling the climate crisis yet current financial flows remain insufficient inefficient and inequitable This book argues that a new climate finance framework needs to evolve The framework has to include incremental structural changes reforms and innovative solutions that aim at introducing the required shift in the climate finance architecture its institutions standards and practices It proposes multi level actionable interventions to mobilize and deploy climate finance efficiently accessibly affordably and equitably unlocking opportunities to break the current impasse It is an essential read for policymakers financiers and researchers seeking to explore how to overcome financial barriers and seize emerging opportunities in the rapidly evolving landscape of development and climate finance

Climate Change and Development Thomas Tanner, Leo Horn-Phathanothai, 2014-01-10 The evidence for human induced climate change is now overwhelming the brunt of its impacts is already being felt by poor people and the case for urgent action is compelling This book addresses the two greatest challenges of our time averting catastrophic climate change and eradicating poverty and the close interconnections between them Climate Change and Development provides a comprehensive and multi disciplinary foundation for understanding the complex and tangled relationship between development and climate change It argues that transformational approaches are required in order to reconcile poverty reduction and climate protection and secure sustained prosperity in the twenty first century Section One provides the building blocks for understanding climate science and the nexus between climate and development Section Two outlines responses to climate change from the perspective of developing countries with chapters on international agreements climate change mitigation and adaptation and climate finance Each chapter offers analytical tools for evaluating responses enabling readers to ask smart questions about the climate change and development nexus as policy and action evolve in the coming years The last three chapters of the book contained in Section Three are forward looking and focus on why and how development must be re framed to deliver more equitable and sustainable outcomes This

section sets out different critiques of development as usual and explores alternative paradigms of development in a warming and resource constrained world This is an invaluable and clearly written text that uses real world examples to bring to life perspectives from across different disciplines It also contains chapter learning outcomes and end of chapter summaries discussion questions and suggestions for further reading and relevant websites The text is suitable for both undergraduate and postgraduate students as well as those working in international development contexts who wish to get to grips with this pressing global challenge

Florida; Its Scenery, Climate and History ... With Numerous Illustrations Sidney Clopton LANIER,1876

**Climate and Health Resorts** Isaac Burney Yeo,1885 **Climate Change Adaptation and Development** John Carstensen,2018-04-19 Climate change is real and it is man made We have put so many greenhouse gas pollutants into the atmosphere that we will see significant and long term change that we need to adapt and adjust to It is important for development practitioners to understand these impacts and the challenge of how and when to adapt to climate change There are plenty of grim presentations of what the extremes of the possible climate scenarios will throw at us over the next 100 years but not all change will be disastrous some change will be beneficial but much of the change will happen at an unprecedented rate that will require the best possible analysis and understanding of how and when we should adapt to climate change This is important for development practitioners as we invest in ensuring that poverty is reduced and eliminated and the well being of everyone is improved Many countries and communities around the world are vulnerable to the impacts of climate change but developing economies may on one hand be less resilient to the impact but could on the other hand be in a better position to make their development climate smart by making the most efficient use of their economic resources The chapters in this book shine a light on the complexity and the multi dimensional aspects of climate change adaptation They gather some of the experiences of addressing climate change impacts in a development context This book was previously published as a special issue of Development in Practice

Discussions on Climate and Cosmology James Croll,1886 Climate And Development Anil Markandya,Dirk Rübhelke,2021-11-29 The 2015 Paris Accord stated the aim to limit the increase in global mean temperatures to 2 C compared to pre industrial levels and if possible keep it down to 1.5 C Achieving this is possible but the costs incurred are uncertain and the distribution of costs among nations is indistinct Furthermore even if the goal is realised significant impacts from climate change can be expected Evidence indicates that these will be felt most severely in countries that are relatively poor These effects of climate change will be added to by the measures taken to reduce GHGs Together they will determine how climate change affects the prospects for development across the globe The analysis of the interplay between climate change and policies to combat it on the one hand and development on the other are the focus of this book

**On the Treatment of Pulmonary Consumption by Hygiene, Climate, and Medicine ...** James Henry Bennet,1872 **Chile, Its History and Development** George Francis Scott Elliot,1913 **Monthly Review of the California Climate and Crop Service, in Co-operation with the State**

**Agricultural Society** United States. Weather Bureau,1891      **Description of the Country, Its Resources and Development, Glimpses of Its Scenery, Attractions for Tourist Sportsman and Settler** Ontario. Department of Agriculture,1897      Labrador: Its Discovery, Exploration, and Development William Gilbert Gosling,1910 History from the time of the Norsemen to the early 20th century with chapters on cartography Northwest Passage Eskimos Moravian missions boundary dispute and Dr Grenfell      **The Origin and Development of the Moral Ideas** Edward Westermarck,1908
