Complexities And Contraries:

Complexities and Contraries Eugene J. McCarthy, 1982 **Complexity, Cognition, Urban Planning and Design** Juval Portugali, Egbert Stolk, 2016-05-19 This book which resulted from an intensive discourse between experts from several disciplines complexity theorists cognitive scientists philosophers urban planners and urban designers as well as a zoologist and a physiologist addresses various issues regarding cities It is a first step in responding to the challenge of generating just such a discourse based on a dilemma identified in the CTC Complexity Theories of Cities domain The latter has demonstrated that cities exhibit the properties of natural organic complex systems they are open complex and bottom up have fractal structures and are often chaotic CTC have further shown that many of the mathematical formalisms and models developed to study material and organic complex systems also apply to cities The dilemma in the current state of CTC is that cities differ from natural complex systems in that they are hybrid complex systems composed on the one hand of artifacts such as buildings roads and bridges and of natural human agents on the other This raises a plethora of new questions on the difference between the natural and the artificial the cognitive origin of human action and behavior and the role of planning and designing cities The answers to these questions cannot come from a single discipline they must instead emerge from a discourse between experts from several disciplines engaged in CTC

Managing Complexity Through Social Intelligence Jeremy Horne, 2023-03-07 This book presents solutions to problems that are total and based on thinking about how and why humans have organized themselves It discusses how to avoid the now well documented Holocene Extinction propelled by climate change wars resource depletion desertification degrading knowledge quality famine and deterioration of societies overall It explains why we cannot respond effectively with hedonistic incompetent corrupt and anarchistic liberal democracy and why neither personality cult regimes can suffice The book offers a model of an organic social structure embodying a collective consciousness of communitarianism and Platonic style ethos Putting an emphasis on the re establishment of Classical Greek virtue it offers solutions to resolve identity politics alienation and meritocracy While doing so the author opposes the everyone is equal ideology to govern the section of policymakers instead circumscribing rights in terms of responsibilities prioritizing education and training to carry forth the ethos of valuing truth above materialism and developing Durkheim's social brain via a new discipline sociointelligence The book goes on to explain how underpinning these elements is a comprehensive elucidation of often misunderstood words like liberty freedom authoritarianism and democracy All of these areas are arranged and combined in uniquely describing the organic society the author deems necessary to avoid human extinction As a result the book presents a new organicity where the emerging transhumanism seeks to transcend hydrocarbon based life with humanly constructed life This book will appeal to students researchers and scholars of political science philosophy and the social sciences interested in a better understanding of complexity democratic theory Holocene Extinction organic thinking and meritocratic societies

Coherence in the Midst of Complexity H. Letiche, M.

Lissack,2011-01-02 A discussion on the social complexity approach where dialogue and stories allow for the degrees of freedom needed for the opportunities of emergence to take root The authors focus on the experience of coherence and how such experiential lessons differ from the establishment and maintenance of categories and labels **Society in its Challenges** Santiago Sia,2014-03-17 Living in society has always presented a variety of challenges to its members These challenges need to be addressed if there is to be an improvement in the quality of life in society However to what extent can philosophical thinking facilitate the task This book pursues and answers this question It offers an analysis of fundamental issues and provides philosophical considerations of the challenges arising from living in society The topics discussed here include philosophy and the social context individual interests and the common good dualistic thinking of and in society relationships and communal life the individual and society ethical thinking and formation images reality and truth the power and limits of human freedom social roles public office and moral society economic crisis and accountability the marketplace academia education contemporary society and faith based education and the meaning and significance of life After reviewing these discussions the concluding chapter then sets out a philosophical vision to facilitate an understanding of and motivation for the creative advance of society **Contraries** Michael Hamburger,1970 *Medical Reasoning* Erwin B. Montgomery (Jr.),2019 Modern medicine is one of humankind s greatest achievements Yet today frequent medical errors and irreproducibility in biomedical research suggest that tremendous challenges beset it Understanding these challenges and trying to remedy them have driven considerable and thoughtful critical analyses but the apparent intransigence of these problems suggests a different perspective is needed Now more than ever when we see options and opportunities for healthcare expanding while resources are diminishing it is extremely important that healthcare professionals practice medicine wisely In *Medical Reasoning* neurologist Erwin B Montgomery Jr offers a new and vital perspective He begins with the idea that the need for certainty in medical decision making has been the primary driving force in medical reasoning Doctors must routinely confront countless manifestations of symptoms diseases or behaviors in their patients Therefore either there are as many different diseases as there are patients or some economical set of principles and facts can be combined to explain each patient s disease The response to this epistemic conundrum has driven medicine throughout history the challenge is to discover principles and facts and then to develop means to apply them to each unique patient in a manner that provides certainty This book studies the nature of medical decision making systematically and rigorously in both an analytic and historical context addressing medicine s unique need for certainty in the face of the enormous variety of diseases and in the manifestations of the same disease in different patients The book also examines how the social legal and economic circumstances in which medical decision making occurs greatly influence the nature of medical reasoning *Medical Reasoning* is essential for those at the intersection of healthcare and philosophy **The Nation** ,1982 **Interpretations** ,1982 **American Journal of Theology & Philosophy** ,1984 The Encyclopedia of the Irish in America Michael

Glazier,1999 Distinguished scholars from American Ireland Canada and Britain have contributed major articles about important events themes and people of the Irish saga in American from colonial times to today *The Philosophy of Alfred North Whitehead* Paul Arthur Schilpp,1941 Donated by Sydney Harris Autobiography Carolyn A. Barros,2026-02-16 In Autobiography Narrative of Transformation Carolyn Barros creates a primer for the study of autobiography a genre many consider highly problematic She sees autobiography as a narrative of transformation a text that presents the before and after of an individual s life Focusing on autobiography as narrative of something that happened to me Barros highlights the various metamorphoses that are emplotted bounded and framed by the author s language and demonstrates that change is the operative metaphor in autobiographical discourse The study focuses primarily on autobiographies from the rich Victorian period Thomas Carlyle s Sartor Resartus as it self consciously fictionalized the composition of Diogenes Teufelsdr ckh s life narrative provides a striking analog and paradigm for introducing the study and its methodological approach Barros s major chapters on John Henry Cardinal Newman John Stuart Mill Charles Darwin and Margaret Oliphant detail four very different types of autobiographical transformation religious philosophical scientific and literary and in Barros s judgment establish benchmarks for considering autobiographies from antiquity to the present A final chapter discusses autobiography s significance to an individual writer s corpus to a particular culture and finally to a history of narratives of transformation
