- I never would have dreamed that.....
- Stop!
- If I had a million dollars to spend.....
- The boy disappeared into the forest.....
- I closed my eyes for just a minute.....
- We hid under the bed....
- I had the craziest dream.....
- Just as the traffic light turned green.....
- The phone rang again and again.....
- The baby screamed louder and
- Betsy didn't believe in fairy godmothers until....
- I have never been as embarrassed as when.....
- The door to the haunted house opened.....
- Just before sunrise.....
- A little light was drawing closer.....
- The teacher had steam coming from his ears...
- Dad was the maddest I have ever seen him....
- It was the best Christmas ever.....
- If only I hadn't.....
- The house looked strangely different....
- Oraken the dragon landed in the car-park....

Starter Cultures in Food Production Barbara Speranza, Antonio Bevilacqua, Maria Rosaria Corbo, Milena Sinigaglia, 2017-02-06 Starter cultures have great significance in the food industry due to their vital role in the manufacture of flavour and texture development of fermented foods. Once mainly used in the dairy industry, nowadays starter cultures are applied across a variety of food products including meat, sourdough, vegetables, wine, and fish. New data on the potential health benefits of these organisms has led to additional interest in starter bacteria. *Starter Cultures in Food Production* details the most recent insights into starter cultures, opening with a brief description of the current selection protocols and industrial production of starter cultures. The book then focuses on the innovative research aspects of starter cultures in food production. Case studies for the selection of new starter cultures for different food products, including sourdough and cereal-based foods, table olives and vegetables, dairy and meat products, fish, and wine, are presented before chapters devoted to the role of lactic acid bacteria in alkaline fermentations and ethnic fermented foods. This book will provide food producers, researchers, and students with a tentative answer to the emerging issues of how to use starter cultures and how microorganisms could play a significant role in the complex process of food innovation. *Dairy Science and Technology* P.
