Creating Capturing Value:

Creating and Capturing Value through Crowdsourcing Christopher L. Tucci, Allan Afuah, Gianluigi Viscusi, 2018-03-02
Examples of the value that can be created and captured through crowdsourcing go back to at least 1714 when the UK used crowdsourcing to solve the Longitude Problem obtaining a solution that would enable the UK to become the dominant maritime force of its time Today Wikipedia uses crowds to provide entries for the world's largest and free encyclopedia Partly fueled by the value that can be created and captured through crowdsourcing interest in researching the phenomenon has been remarkable Despite this or perhaps because of it research into crowdsourcing has been conducted in different research silos within the fields of management from strategy to finance to operations to information systems biology communications computer science economics political science among others In these silos crowdsourcing takes names such as broadcast search innovation tournaments crowdfunding community innovation distributed innovation collective intelligence open source crowdpower and even open innovation This book aims to assemble chapters from many of these silos since the ultimate potential of crowdsourcing research is likely to be attained only by bridging them Chapters provide a systematic overview of the research on crowdsourcing from different fields based on a more encompassing definition of the concept its difference for innovation and its value for both private and public sector Creating and Capturing Value Garth Saloner, A. Michael Spence, 2002 The Stanford cases are written from the perspective of Silicon Valley the heart of the e-commerce revolution Authors are very involved in e-commerce companies providing exceptional real world application and relevance

Capturing Value in Digital Health Eco-Systems Felix Lena Stephanie, Ravi S. Sharma, 2021-11-10 The United Nations Sustainable Development Goals call for the establishment of Good Health and Well-being and target a universal digital healthcare ecosystem by 2030 However existing technology infrastructure is ineffectual in achieving the envisioned target and requires massive reconfiguration to achieve its intended outcome This book suggests a way forward with fair and efficient digital health networks that provide resource efficiencies and inclusive access to those who are currently under-served Specifically a fair and efficient digital health network that provides a common platform to its key stakeholders to facilitate sharing of information with a view to promote cooperation and maximise benefits A promising platform for this critical application is cloud technology with its offer of computing as a utility and resource sharing This is an area that has attracted much scholarly attention as it is well suited to foster such a network and bring together diverse players who would otherwise remain fragmented and be unable to reap the benefits that accrue from cooperation The fundamental premise is that the notion of value in a digital health ecosystem is brought about by the sharing and exchange of digital information However notwithstanding the potential of information and communication technology to transform the healthcare industry for the better there are several barriers to its adoption the most significant one being misaligned incentives for some stakeholders This book suggests among other findings that e-health in its true sense can become fair and efficient if and only

if a regulatory body concerned assumes responsibility as the custodian of its citizens health information so that collaboration for value will replace competition for revenue as the new axiom in delivering the public good of healthcare through digital networks

Mind Your Own Business Martin Daniel Mileros, 2020-03-16

In the context of what is commonly referred to as consumer centric digital economy personal data has become the new currency which is utilized by consumers to be granted access to seemingly free apps within so called digital zero price markets Simultaneously there are consumers known as content creators who can generate million dollar revenues annually The current understanding of how consumers create and capture value within this new digital economy is scarce and more research is needed to systematically build a basis for creating an understanding of value creation and capture in the consumer centric digital economy based on a consumer perspective The purpose of this dissertation is consequently to explore how consumers create and capture value within a consumer centric digital economy The explorative study also serves to obtain an initial overview of the phenomenon and the widely dispersed literature which spans different research fields The collected data constitute more than 500 articles in combination with empirical data collected from websites Based on the current literature central concepts related to consumer centric digital economy are explained These include for instance Web 2.0 user generated content and the consumer to business relationship The different concepts are discussed in relation to each other and a trend analysis shows that these concepts are on the rise and have become increasingly popular The results show that consumers within the digital economy may take different roles and some create value as business oriented consumers i.e. consumers who have a commercial interest For instance they make a business out of their participation in the digital economy Examples are YouTubers bloggers or creators in virtual worlds such as Second Life Another probably larger category is characterized as traditional consumers for instance they participate in the digital economy through their use of seemingly free apps but do not reap any direct monetary benefits By sharing their personal data they take part in value creation in a more passive way The findings also indicate that the level of control e.g. determined by whether or not value is created within the digital platform may characterize the prerequisites for value capture Based on this a taxonomy for value creation and value capture by consumers in the digital economy is developed The study also identifies different business model types for business oriented consumers

I samband med vad som benämns konsumentcentrisk digital ekonomi har persondata blivit den nya valutan som används av konsumenter för att få tillgång till tillsynes gratis applikationer inom så kallade digitala nollprismarknader Samtidigt finns det konsumenter som kallade innehållsskapare content creators som kan generera intäkter som uppgår till flera miljoner euro per år Den nuvarande forskningen visar hur konsumenter skapar och fångar värde inom denna nya digitala ekonomi och begränsar det behovet av mer forskning för att systematiskt bygga upp en grund för att skapa förvärdskapande och värdefullt inom den konsumentcentriska digitala ekonomin utifrån ett konsumentperspektiv Syftet med denna avhandling är förhoppningsvis att undersöka hur konsumenter skapar och fångar värde inom en konsumentcentrisk digital ekonomi Den

explorativa studien bidrar också till att ge en initial översikt över fenomenet och den spridda litteraturen som sträcker sig över olika forskningsområden. Databasinsamlingen utgörs av mer än 500 artiklar i kombination med empiriska data som har insamlats från webbplatser. Baserat på aktuell litteratur förklaras centrala koncept som relaterar till konsumentcentrisk digital ekonomi. Dessa koncept inkluderar bland annat Web 2.0, User generated content och consumer to business relationen. De olika koncepten har ställts mot varandra och en trendanalys av dem visar att de blivit allt populärare. Resultaten påvisar att konsumenterna inom den digitala ekonomin kan ta på sig olika roller som exempelvis affärsinriktade konsumenterna och konsumenterna som har ett kommersiellt intresse. Till exempel skapar de affärer utifrån sin delaktighet i den digitala ekonomin. Det kan handla om YouTubers, bloggare eller skapare inom virtuella världar såsom Second Life. En annan och troligtvis större kategori kan karaktäriseras som passiva konsumenterna utifrån sin delaktighet i den digitala ekonomin genom användandet av till synes fria appar där de inte skördar några direkta monetära fördelar. Genom att ge tillgång till persondata så bidrar de på ett passivt sätt till värdeskapandet. Resultaten påvisar också att måjligheterna att fånga värdet består av om värdeskapandet har skett inom eller utanför ramarna för den digitala plattformen. Baserat på detta har en taxonomi för konsumenternas måjlighet att skapa och fånga värden inom den digitala ekonomin utarbetats. Studien identifierar även olika affärsmodeller för affärsinriktade konsumenterna.

The Purpose of Business. Where Value meets Strategic Sustainable Development Sophia von Petersdorff, 2018-08-13. Master's Thesis from the year 2018 in the subject Business economics, General grade 1.6, Blekinge Institute of Technology. Strategic Sustainability, language English, abstract. The current global economic paradigm centred on growth is a significant barrier in the transition towards a sustainable society. Business as Usual, companies operating within this paradigm are perceived to prosper at the expense of society and environment, which is not viable on a finite planet. The need to rethink the purpose of business is inevitable as maximising shareholder value has been deemed insufficient to create a sustainable society. This study aimed to explore how business models can be used to create value that supports Strategic Sustainable Development. Previous research proposed that the concept of Business Models for Sustainability helps business place sustainability at the core of all consideration. A qualitative research was chosen for which we employed the Framework for Strategic Sustainable Development and combined a literature review with an investigation of three expert groups to answer our research question. Our findings showed that

compared to other value forms system value is the most appropriate concept for businesses striving towards sustainable development Based on our findings six themes emerged that businesses need to address to accelerate the speed of change towards sustainability To make a relevant contribution to the intended audience a prototype has been developed based on our findings
