Document Image Analysis:

Handbook Of Character Recognition And Document Image Analysis Horst Bunke,Patrick S P Wang,1997-05-02 Optical character recognition and document image analysis have become very important areas with a fast growing number of researchers in the field This comprehensive handbook with contributions by eminent experts presents both the theoretical and practical aspects at an introductory level wherever possible

Structured Document Image Analysis Henry S. Baird,Horst Bunke,Kazuhiko Yamamoto,2012-12-06 Document image analysis is the automatic computer interpretation of images of printed and handwritten documents including text drawings maps music scores etc Research in this field supports a rapidly growing international industry This is the first book to offer a broad selection of state of the art research papers including authoritative critical surveys of the literature and parallel studies of the architecture of complete high performance printed document reading systems A unique feature is the extended section on music notation an ideal vehicle for international sharing of basic research Also the collection includes important new work on line drawings handwriting character and symbol recognition and basic methodological issues The IAPR 1990 Workshop on Syntactic and Structural Pattern Recognition is summarized including the reports of its expert working groups whose debates provide a fascinating perspective on the field The book is an excellent text for a first year graduate seminar in document image analysis and is likely to remain a standard reference in the field for years

Document Image Analysis Lawrence O'Gorman,Rangachar Kasturi,1995

Document Image Analysis Horst Bunke,Patrick S P Wang,Henry S Baird,1994-12-20 Interest in the automatic processing and analysis of document images has been rapidly increasing during the past few years This book addresses the different subfields of document image analysis including preprocessing and segmentation form processing handwriting recognition line drawing and map processing and contextual processing

Document Image Analysis K.C. Santosh,2018-09-18 The book focuses on one of the key issues in document image processing graphical symbol recognition which is a sub field of the larger research domain of pattern recognition It covers several approaches statistical structural and syntactic and discusses their merits and demerits considering the context Through comprehensive experiments it also explores whether these approaches can be combined The book presents research problems state of the art methods that convey basic steps as well as prominent techniques evaluation metrics and protocols and research standpoints directions that are associated with it However it is not limited to straightforward isolated graphics visual patterns recognition it also addresses complex and composite graphical symbols recognition which is motivated by real world industrial problems

Page Segmentation and Identification for Document Image Analysis Boulos Waked,2001 The main objective of this thesis is to develop a system to automatically segment and label a variety of real life documents written in different languages The main idea is to partition the whole document into different subimages and assign to each of them one of two labels text or non text including graphics and then identify the text as one of three categories Roman Ideographic or Arabic

script The whole process consists of several steps For instance to detect the skew angle of the document we use the Hough transform and the most frequently occurring local maximum Moreover in order to segment the page into regions we have developed a novel approach based on diagonal scanning and node edge orientation Then text and graphic components are also isolated using the geometric configuration of the connected components Next the textual components are segmented into lines using the projection profile and finally the script is classified into one of the three categories mentioned above using the bounding boxes and horizontal projection The system has been tested on 215 samples of diverse document types from many sources such as journal articles magazines newspapers facsimiles and office correspondence These testing samples include low quality document images with different types of distortion they also contain upside down skewed and low resolution images The system classifies 93.5% of the script type correctly and 6.5% of these documents incorrectly

Executive Briefing Lawrence O'Gorman, Rangachar Kasturi, 1997 This new executive briefing describes the technical methods and systems used for document processing of text and graphical images These methods evolved from the fields of digital signal processing digital image processing and pattern recognition The briefing gives executives and managers vital information on document processing approaches and details how these methods apply in different situations If you are an executive manager or other decision maker whose business requires acquaintance or understanding of document processing this book will prove to be a valuable asset The briefing identifies major problem areas describes multiple methods that you can apply to each problem and discusses their advantages and disadvantages It includes both technology descriptions as well as references to technical papers that detail the techniques
