

- **Refine Primers:** Use the "Edit Sequence" feature to refine the target region or the primer parameters and run Primer-BLAST again to generate new candidate primers.
- **Test the Primers:** Once the primers are designed, it is important to experimentally validate their efficiency and specificity using PCR.
- **NCBI** also provides other primer design tools, such as the Primer3 program, which can be accessed through the NCBI website or downloaded as standalone software. Additionally, there are other commercial primer design tools available that can provide additional features and options for primer design.
