Document Analysis Systems: Theory and Practice Seong-Whan Lee, Yasuaki Nakano, 2014-03-12 Recently there has been an increased interest in the research and development of techniques for components of complete document analysis systems In recognition of this trend a series of workshops on Document Analysis Systems commenced in 1994 under the leadership of Henry Baird The first workshop held in Kaiserslautern Germany in October 1994 was chaired by Andreas Dengel and Larry Spitz The second workshop on

Document Analysis Systems was held in Malvern PA USA in October 1996 chaired by Jonathan J Hull and Suzanne Liebowitz Taylor The DAS workshop has been one of the most prestigious technical meetings bringing together a large number of scientists and engineers from all over the world to express their innovative ideas and report on their latest achievements in the area of document analysis systems The papers in this special book edition were rigorously selected from the Third IAPR Workshop on Document Analysis Systems DAS 98 held in Nagano Japan on 4 6 November 1998 It is worth mentioning that the papers were chosen for their original and substantial contributions to the workshop theme and this special book edition From among the 53 papers that were presented by authors from 11 countries at the DAS 98 after critical reviews by at least three experts we carefully selected 29 papers for this special book edition Most of the contributions in this edition have been expanded or extensively revised to include helpful discussions suggestions or comments made during the workshop

Document Analysis Systems VI Simone Marinai, Andreas Dengel, 2004-08-26

This volume contains papers selected for presentation at the 6th IAPR Workshop on Document Analysis Systems DAS 2004 held during September 8 10 2004 at the University of Florence Italy Several papers represent the state of the art in a broad range of traditional topics such as layout analysis applications to graphics recognition and handwritten documents Other contributions address the description of complete working systems which is one of the strengths of this workshop Some papers extend the application domains to other media like the processing of Internet documents The peculiarity of this 6th workshop was the large number of papers related to digital libraries and to the processing of historical documents a taste which frequently requires the analysis of color documents A total of 17 papers are associated with these topics whereas two years ago in DAS 2002 only a couple of papers dealt with these problems In our view there are three main reasons for this new wave in the DAS community From the scientific point of view several research fields reached a thorough knowledge of techniques and problems that can be effectively solved and this expertise can now be applied to new domains Another incentive has been provided by several research projects funded by the EC and the NSF on topics related to digital libraries
