Reclaiming Personalized Learning Paul Emerich France, 2019-10-01. Where exactly did personalized learning go so wrong? For teacher and consultant Paul France, at first technology-powered personalized learning seemed like a panacea. But after three years spent at a personalized learning start-up and network of microschoools, he soon realized that such corporate-driven individualized learning initiatives do more harm than good, especially among our most vulnerable students. The far superior alternative: A human-centered pedagogy that prioritizes children over technology. First, let's be clear: Reclaiming Personalized Learning is not yet another ed-tech book. Instead, it's a user's guide to restoring equity and humanity to our classrooms and schools through personalization. One part polemical, eleven parts practical, the book describes how to: Shape whole-class instruction, leverage small-group interactions, and nurture a student's inner dialogue; Cultivate awareness within and among students, and build autonomy and authority; Design curriculum with a flexible frame and where exactly the standards fit; Humanize assessment and instruction, including the place of responsive teaching; Create a sense of belonging; humanize technology integration, and effect socially-just teaching and learning. All central issues in equity. The truth is this: there's no one framework, there's no one tool that makes learning personalized. What personalized learning companies with a

vested interest in profits might tempt you to believe It s people who personalize learning and people not technology must be at the center of education The time is now for all of us teachers to reclaim personalized learning and this all important book is our very best resource for getting started This is a compelling and critically important book for our time With rich stories of teaching and learning Paul France considers ways to create the most positive learning experiences possible JO BOALER Nomellini Olivier Professor of Education Stanford Graduate School of Education This brilliant book is a major contribution to the re imagination of learning and teaching for the twenty first century and should be essential reading for new and experienced teachers alike TONY WAGNER Senior Research Fellow Learning Policy Institute In these troubled times this book is more than a breath of fresh air it is a call to action Paul gives us an accessible and sophisticated book that explains how and why we should celebrate the humanity of every single student JIM KNIGHT Senior Partner of the Instructional Coaching Group ICG and Author of The Impact Cycle *Smart Trends in Computing and Communications* Tomonobu Senjyu,Chakchai So-In,Amit Joshi,2025-09-30 This book gathers high quality papers presented at the Ninth International Conference on Smart Trends in Computing and Communications SmartCom 2025 organised by Global Knowledge Research Foundation GR Foundation from 29 to 31 January 2025 in Pune India It covers state of the art and emerging topics in information computer communications and effective strategies for their use in engineering and managerial applications It also explores and discusses the latest technological advances in and future directions for information and knowledge computing and its applications Personalized Learning Through Adaptive Systems and Intelligent Tutoring Benabid, Assia,El Imadi, Imane,Chemsi, Ghizlane,2025-06-06 Artificial intelligence AI transforms e learning through tools like personalized online learning experiences adaptive learning systems and intelligent tutors AI driven technologies adjust the content based on the individual learner s needs enhancing engagement and learning outcomes As these intelligent tools utilize data to gain insight into the user and user needs it is imperative that the data be kept private Further research is important to address issues concerning algorithmic bias impacting equality Personalized Learning Through Adaptive Systems and Intelligent Tutoring delves into natural language processing for content generation and student feedback as well as AI s role in enhancing learner engagement and motivation through gamification and virtual environments It addresses future trends and innovations in AI for education featuring case studies and contributions from researchers educators and platform developers Covering topics such as recommendation systems educational disparities and metacognitive awareness this book is an excellent resource for teachers e learning platform developers computer scientists professionals researchers scholars academicians and more **Handbook of Personalized Learning** Matthew L.
