The Battle of the Books in Its Historical Setting Anne Elizabeth Burlingame,1920 The Battle of the Books W. J. McCormack,1986 The war of words between critics and writers is no paper conflict but affects daily life where literature and politics interact The twentieth century concern is nowhere more evident than in Ireland today where the growing Troubles in Ulster gave critical debate particular focus In this clear eyed survey Bill McCormack assesses the alliances the animosities the factions seeking to show the common ground they share even as they dispute its possession In his analysis of individual writers journals and larger enterprises McCormack raises some unexpected possibilities Is Conor Cruise O Brien best understood as a Catholic mystic

Should Field Day be seen as a depoliticising force in Irish culture What truly distinguishes the manoeuvres of Seamus Heaney Terence Brown Edna Longley and Denis Donoghue from each other Have critics begun to learn from historians or have historians begun to fight shy of culture Is the British Literary Left imperialist Is there a non sectarian art Underlying this polished and stimulating critique is a sombre awareness of literature s contribution to political malaise and a call for an engagement with the real forces that govern people s lives

Melting the Earth Haraldur Sigurdsson,1999 From prehistoric times to the fiery destruction of Pompeii in 79 A D and the more recent pyrotechnics of Mt St Helens volcanic eruptions have aroused fear inspired myths and religious worship and prompted heated philosophical and scientific debate Melting the Earth chronicles humankind s attempt to understand this terrifying phenomenon and provides a fascinating look at how our conception of volcanoes has changed as knowledge of the earth s internal processes has deepened over the centuries A practicing volcanologist and native of Iceland where volcanoes are frequently active Haraldur Sigurdsson considers how philosophers and scientists have attempted to answer the question Why do volcanoes erupt He takes us through the ideas of the ancient Greeks who proposed that volcanoes resulted from the venting of subterranean winds and the internal combustion theories of Roman times and notes how thinking about volcanoes took a backward symbolic turn with the rise of Christian conceptions of Hell a direction that would not be reversed until the Renaissance He chronicles the 18th century conflict between the Neptunists who believed that volcanic rocks originated from oceanic accretions and the Plutonists who argued for the existence of a molten planetary core and traces how volcanology moved from divine science and armchair geology to empirical field study with the rise of 19th century naturalism Finally Sigurdsson describes how 19th and 20th century research in thermodynamics petrology geochemistry and plate tectonics contribute to the current understanding of volcanic activity Drawing liberally from classical

sources and firsthand accounts this chronicle is not only a colorful history of volcanology but an engrossing chapter in the development of scientific thought
