together in diverse societies Motivated by a desire to show solidarity these initiatives demonstrate enormous creativity in fostering pluralism in an environment that has largely become hostile to the arrival of newcomers The contributions gathered here seek to explore such initiatives and the important work that they do in fostering ways of living together with others from diverse cultural and religious backgrounds In focusing conceptually and empirically on discussions and examples of civil society initiatives this book interrogates why how and under what circumstances are some communities more welcoming than others

Iconoclasm in Aesthetics Michael Kelly, 2003-09-04 Contemporary theorizing about art is dominated by a clash between two approaches philosophers have characteristically taken the view that art is a vehicle of some universal meaning or truth while art historians and others working in the humanities emphasize the concrete nature and historical particularity of the work of art Is art capable of sustaining these two approaches Or as Kelly argues is art rather determined by its historical particularity If so then if philosophers continue to pursue mainly the universality of art they inadvertently end up exhibiting a disinterest and distrust in art Kelly calls such disinterest and distrust iconoclasm and in this book he discusses four philosophers Heidegger Adorno Derrida and Danto who are ultimately iconoclasts despite their deep philosophical engagement with the arts He concludes by suggesting ways in which iconoclasm in aesthetics can be avoided in the future
