Comprehensive Hard Materials Daniele Mari, Luis Miguel, Christoph E. Nebel, 2014-02-01 Comprehensive Hard Materials Three Volume Set deals with the production uses and properties of the carbides nitrides and borides of these metals and those of titanium as well as tools of ceramics the superhard boron nitrides and diamond and related compounds Articles include the technologies of powder production including their precursor materials milling granulation cold and hot

compaction sintering hot isostatic pressing hot pressing injection moulding as well as on the coating technologies for refractory metals hard metals and hard materials The characterization testing quality assurance and applications are also covered Comprehensive Hard Materials provides meaningful insights on materials at the leading edge of technology It aids continued research and development of these materials and as such it is a critical information resource to academics and industry professionals facing the technological challenges of the future Hard materials operate at the leading edge of technology and continued research and development of such materials is critical to meet the technological challenges of the future Users of this work can improve their knowledge of basic principles and gain a better understanding of process structure property relationships With the convergence of nanotechnology coating techniques and functionally graded materials to the cognitive science of cemented carbides cermets advanced ceramics super hard materials and composites it is evident that the full potential of this class of materials is far from exhausted This work unites these important areas of research and will provide useful insights to users through its extensive cross referencing and thematic presentation To link academic to industrial usage of hard materials and vice versa this work deals with the production uses and properties of the carbides nitrides and borides of these metals and those of titanium as well as tools of ceramics the superhard boron nitrides and diamond and related compounds

Applications of Advanced Ceramics in Science, Technology, and Medicine K. Chandra Babu Naidu, N. Suresh Kumar, 2020-10-02 Applications of Advanced Ceramics in Science Technology and Medicine explores a broad range of advanced ceramic materials and their innovative applications in distinct fields Chapters cover applications such as actuators energy storage environmental health and monitoring 3D printing electronics biomedical engineering and EMI shielding Chapters provide readers with an overview of the structural and fundamental properties synthesis strategies and versatile applications of advanced ceramic materials and their composites The information in the volume will be beneficial for students research scholars faculty members and R D specialists working in the area of material science nanotechnology solid state science chemical engineering power sources and renewable energy storage

Advances in Sintering Science and Technology E. A. Olevsky, Rajendra Bordia, 2010-02-04 This issue of the Ceramic Transactions compiles 41 papers covering a rich diversity of the sintering science and technology topics These papers were presented at the International Conference on Sintering November 16 20 2008 in La Jolla California The Ceramic Transactions series contains a collection of papers dealing with issues in both traditional ceramics i e glass whitewares refractories and porcelain enamel and advanced ceramics Topics covered in the area of advanced ceramic include bioceramics nanomaterials composites solid oxide fuel cells mechanical properties and structural design advanced ceramic coatings ceramic armor porous ceramics and more
