**Ethics of Global Development** David A. Crocker, 2008-07-10 Poverty inequality violence environmental degradation and tyranny continue to afflict the world Ethics of Global Development offers a moral reflection on the ends and means of local national and global efforts to overcome these five scourges After emphasizing the role of ethics in development studies policy making and practice David A Crocker analyzes and evaluates Amartya Sen s philosophy of development in relation to alternative ethical outlooks He argues that Sen s turn to robust ideals of human agency and democracy improves on both Sen s earlier emphasis on capabilities and functionings and Martha Nussbaum s version of the capability orientation This agency focused capability approach is then extended and strengthened by applying it to the challenges of consumerism and hunger the development responsibilities of affluent individuals and nations and the dilemmas of globalization Throughout the book the author argues for the importance of more inclusive and deliberative democratic institutions

**How Groups Matter** Gideon Calder, Magali Bessone, Federico Zuolo, 2014-04-11 When groups feature in political philosophy it is usually in one of three contexts the redressing of past or current injustices suffered by ethnic or cultural minorities the nature and scope of group rights and questions around how institutions are supposed to treat a certain specific identity cultural ethnic group What is missing from these debates is a comprehensive analysis of groups as both agents and objects of social policies While this has been subject to much scrutiny by sociologists and social psychologists it has received less attention from a normative and philosophical point of view This volume asks what problems are posed to political philosophy by a collection of individuals who act or are treated in a collective way Focusing not only on ways in which institutions should treat groups but also on the normative implications of considering groups as possible social agents when acting either in vertical relations with the state or in horizontal relations with other groups or individuals this book explores these issues from both theoretical and practical perspectives Contributors address both the nature of political and social philosophy itself and the ways in which specific issues affirmative action race religion and places of worship the rights of states have become political and social priorities
