

Sets of Numbers

- The **natural numbers** are the set of numbers used when counting; these are the numbers $\{1, 2, 3, 4, 5, \dots\}$.
- The **whole numbers** are the set of natural numbers and zero; these are the numbers $\{0, 1, 2, 3, 4, 5, \dots\}$.
- The **integers** are the set of whole numbers and their opposites; these are the numbers $\{\dots, -3, -2, -1, 0, 1, 2, 3, \dots\}$.
- The **rational numbers** are the set of numbers that can be expressed as a fraction of two integers where the denominator is not zero. Rational numbers include the set of natural numbers, whole numbers, and integers.

EX: $-1, \frac{2}{3}, 0, 2, \sqrt{16}, 2\frac{1}{2}, 0.8\bar{3}, 2.35$

- The **irrational numbers** are the set of numbers that cannot be expressed as a fraction of two integers.

EX: $\pi, \sqrt{2}, \sqrt[3]{10}$

- The **real numbers** are the set of rational numbers and irrational numbers.

EX: $-1, \pi, \frac{1}{2}, \sqrt{5}, \sqrt[3]{64}, 0.125, \sqrt[3]{27}, 0.7$

- The **imaginary numbers** are the set of square roots of negative numbers, written in the form bi , where i is a nonzero real number and $b = \sqrt{-b^2}$.

EX: $-1, 1, 3i, \sqrt{-16}, -\sqrt{-100}$

- The **complex numbers** are the set of real numbers plus an imaginary number, written in the form $a + bi$, where a and b are real numbers and $i = \sqrt{-1}$.

EX: $8 + 2i, -6 + i, -4 - 3i, 7 - 6i, 0$

Solving Equations

When you perform the same operation to each side of an equation, the result is a new equation that has the same solution. Equations that have the same solution(s) are **equivalent equations**.

Using the Addition Property of Equality

The **Addition Property of Equality** states that when the same number is added to equal numbers, the sums are equal.

RULE: If a , b , and c are any real numbers and $a = b$, then $a + c = b + c$.

EX: $2 + 7 = 2 + 7$

Applying this property to equations, when the same number is added to each side of an equation, the result is an equivalent equation.

EX: If $x - 2 = 11$, then $x - 2 + 2 = 11 + 2$, or $x = 13$

Using the Subtraction Property of Equality

The **Subtraction Property of Equality** states that when the same number is subtracted from equal numbers, the differences are equal.

RULE: If a , b , and c are any real numbers and $a = b$, then $a - c = b - c$.

EX: $12 - 6 = 12 - 6$

Applying this property to equations, when the same number is subtracted from each side of an equation, the result is an equivalent equation.

EX: If $y + 7 = 15$, then $y + 7 - 7 = 15 - 7$, or $y = 8$.

Using the Multiplication Property of Equality

The **Multiplication Property of Equality** states that when equal numbers are multiplied by the same number, the products are equal.

RULE: If a , b , and c are any real numbers and $a = b$, then $ac = bc$.

EX: $3 \cdot 4 = 3 \cdot 4$

Applying this property to equations, when both sides of an equation are multiplied by the same real number, the result is an equivalent equation.

EX: If $\frac{x}{4} = 3$, then $\left(\frac{x}{4}\right) \cdot 4 = 3 \cdot 4$, or $x = 12$

Using the Division Property of Equality

The **Division Property of Equality** states that when equal numbers are divided by the same nonzero number, the quotients are equal.

RULE: If a , b , and c are any real numbers, $c \neq 0$, and $a = b$, then $\frac{a}{c} = \frac{b}{c}$.

EX: $\frac{12}{3} = \frac{12}{3}$

Applying this property to equations, when both sides of an equation are divided by the same nonzero real number, the result is an equivalent equation.

EX: If $7x = 21$, then $\frac{7x}{7} = \frac{21}{7}$, or $x = 3$

Solving Multistep Equations

Some equations require more than one inverse operation to solve. The goal when solving a multistep equation is to isolate the variable (i.e., get it by itself). To do this, use the properties of equality. If there are like terms on one side of an equation, they should be combined before using the properties.

EX: Solve the equation $5x + 2x - 1 = 15$

- | | |
|----------------------------------|--|
| 1. $5x + 2x - 1 = 15$ | 1. Original equation |
| 2. $7x - 1 = 15$ | 2. Combine like terms. |
| 3. $7x - 1 + 1 = 15 + 1$ | 3. Use the Addition Property of Equality to isolate the variable and combine like terms. |
| 4. $7x = 16$ | 4. Simplify. |
| 5. $\frac{7x}{7} = \frac{16}{7}$ | 5. Use the Division Property of Equality to isolate the variable. |
| 6. $x = \frac{16}{7}$ | 6. Simplify. |

Variables on Both Sides

When an equation has variables on both sides, the objective is to get all variable terms on the same side of the equation by using either the Addition or Subtraction Property of Equality.

EX: Solve the equation $4x - 8 = 2x$

- | | |
|---------------------------------|--|
| 1. $4x - 8 = 2x$ | 1. Original equation |
| 2. $4x - 2x - 8 = 2x - 2x$ | 2. Use the Subtraction Property of Equality to move the variable term to one side. |
| 3. $2x - 8 = 0$ | 3. Simplify. |
| 4. $2x - 8 + 8 = 0 + 8$ | 4. Use the Addition Property of Equality to isolate the variable term. |
| 5. $2x = 8$ | 5. Simplify. |
| 6. $\frac{2x}{2} = \frac{8}{2}$ | 6. Use the Division Property of Equality to isolate the variable. |
| 7. $x = 4$ | 7. Simplify. |

Solving Absolute Value Equations

The **absolute value** of a number is its distance from zero on the number line. Therefore, the equation $|x| = 4$ has two solutions, 4 and -4 , since both have a distance of 4 units from zero on the number line.

To solve an equation $|4x| = 8$, where 4 is a positive number, solve the disjunction $x = 2$ or $x = -2$.

EX: Solve the equation $|x + 3| = 3$

- | | |
|--|--|
| 1. $ x + 3 = 3$ | 1. Original equation |
| 2. $x + 3 = 3$ or $x + 3 = -3$ | 2. Write a disjunction. |
| 3. $x + 3 - 3 = 3 - 3$ or $x + 3 - 3 = -3 - 3$ | 3. Use the Subtraction Property of Equality to isolate the variable. |
| 4. $x = 0$ or $x = -6$ | 4. Simplify. |

Solving Inequalities

An **inequality** shows the relationship between two numbers or expressions. The solution of an inequality is the set of numbers that make the inequality true.

Addition & Subtraction Properties

The **Addition and Subtraction Properties of Inequality** state that adding or subtracting the same number on each side of an inequality produces an equivalent inequality.

If a , b , and c are real numbers, then the following are true: **Addition Property of Inequality:** If $a < b$,

then $a + c < b + c$; or **Subtraction Property of Inequality:** If $a < b$, then $a - c < b - c$.

Remember that similar statements hold true for $>$ and \geq .

NUMERIC EXAMPLES

Addition Property of Inequality: Since $4 < 2$, then $4 + 3 < 2 + 3$, since $3 > 0$, then $3 + 6 < 2 + 6$.

Subtraction Property of Inequality: Since $9 < 3$, then $9 - 2 < 3 - 2$, since $-2 < 0$, then $4 - 2 < 7 - 2$.

ALGEBRAIC EXAMPLES

Addition Property of Inequality: If $p - 3 < 11$, then $p - 3 + 3 < 11 + 3$, or $p < 14$.

Subtraction Property of Inequality: If $a + 9 < 16$, then $a + 9 - 9 < 16 - 9$, or $a < 7$.

Multiplication & Division Properties

The **Multiplication and Division Properties of Inequality** state that multiplying or dividing each side of an inequality by a positive number makes an equivalent inequality. These properties also state that multiplying or dividing each side of an inequality by a negative number and reversing the direction of the inequality symbol makes an equivalent inequality.

If a , b , and c are real numbers,

If $a < b$, then $ac < bc$, if $c > 0$.	If $a < b$, then $ac > bc$, if $c < 0$.
If $a > b$, then $ac > bc$, if $c > 0$.	If $a > b$, then $ac < bc$, if $c < 0$.

Remember that similar statements hold true for $>$ and \geq .

NUMERIC EXAMPLES

Multiplication Property of Inequality: Since $2 < 5$, then $2 \cdot 3 < 5 \cdot 3$, since $3 > 0$, then $2 + 2 < 5 + 2$, or $4 < 7$.

Division Property of Inequality: Since $6 > 4$, then $6 \div 2 > 4 \div 2$, since $2 > 0$, then $4 \div 2 < 8 \div 2$, or $2 < 4$.

Division Property of Inequality: Since $4 < 6$, then $\frac{4}{2} < \frac{6}{2}$, since $2 > 0$, then $\frac{4}{-2} > \frac{6}{-2}$. Since $9 < 3$, then $\frac{9}{3} > \frac{3}{3}$, since $3 > 0$, then $\frac{9}{-3} < \frac{3}{-3}$.

Brief Course In College Algebra

Brief Course In College Algebra Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Brief Course In College Algebra free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Brief Course In College Algebra free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Brief Course In College Algebra free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading Brief Course In College Algebra. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic

literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Brief Course In College Algebra any PDF files. With these platforms, the world of PDF downloads is just a click away.

FAQs About Brief Course In College Algebra Books

What is a Brief Course In College Algebra PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Brief Course In College Algebra PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Brief Course In College Algebra PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Brief Course In College Algebra PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Brief Course In College Algebra PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
