Development And Aging In The Nervous System:

Development and Aging in the Nervous System Morris Rockstein, 2012-12-02 Development and Aging in the Nervous System covers the proceedings of a series of symposia by the same title held at the University of Miami Training Program in Cellular Aging on February 19-20, 1973. This book is composed of 11 chapters that specifically consider aging in its total sense from embryonic development through senescence of a vital organ system of the body. The introductory chapters review the age changes in the neuronal microenvironment and the regulative mechanism of neuronal death in cell number control in the nervous system. The next chapters deal with the neuronal degeneration in aging mammals, the selected changes in the developing postnatal rat and the trophic influences in the mammalian central nervous system. These topics are followed by discussions of the genesis of neuronal locus specificity, the vertebrate brain aging and the neurochemical patterns in the developing and aging brain. The remaining chapters describe the mechanisms of enzymatic differentiation in the brain and in cultured cells and the monoamine metabolism in the aging male mouse. This book will prove useful to development and cell biologists, researchers and advanced students. *Development and Aging in the Nervous System* Morris Rockstein, 1973

Development and Aging in the Nervous System, 1973 Model Systems of Development and Aging of the Nervous System Antonia Vernadakis, Alain M. Privat, Jean M. Lauder, Paola S. Timiras, 2012-12-06 The last decade has generated a multitude of studies using in vitro model systems to explore growth and differentiation of the nervous system. Although the findings have been exciting and have revealed unique properties of neural cells, considerable concern continues to be expressed regarding the significance of in vitro findings in terms of their applicability to in vivo biological events. To examine this issue further, a group of scientists presented and discussed their findings at a conference sponsored by the Institute of Developmental Neuroscience and Aging held in Crete, Greece, 26-29 May 1985. The conference was cosponsored by the University of Crete and was generously supported by the Ministry of Research and Technology of Greece, Tourism Organization of Greece and also Sandoz and FIDIA. The Directors of the Institute of Developmental Neuroscience and Aging are indebted to these institutions for their support. For the success of this conference, the Directors owe much to Drs. Eleni Fleischer-Lambropoulos and Yiannis Tsouderos who spent countless hours in making arrangements so that the participants would have not only a scientific but also a unique cultural experience. Several chapters of this book focus on the complex phenomena of neurogenesis and gliogenesis and the modulation of neuronal differentiation. The concept that neuronal differentiation has both genetic and epigenetic components is documented by elegant studies using both in vitro cultured cells and neurons transplanted in vivo. **Development and Aging in the Nervous System** Symposium on the Development and Aging in the Nervous System, Miami, Fla., 1973, 1973 **Molecular Aspects of Development and Aging of the Nervous System** Jean Lauder, 2013-11-21 The rapidly expanding fields of molecular and cellular neurobiology are the newest frontiers of neuroscience. This book represents the continuing efforts of the Institute of Developmental Neuroscience

and Aging IDNA to disseminate the most recent advances on the developing and aging nervous system at the molecular and cellular levels A group of neuroscientists presented and discussed their findings at a recent IDNA conference held in Athens Greece June 15 18 1988 This meeting was sponsored by the National Hellenic Research Foundation FIDIA the Ministry of Research and Technology the Tourism Organization of Greece and the National Institute of Child Health and Human Development NIH The Directors of the IDNA are grateful to the local committee Drs Eleni Fleischer Costas Sekeris Michael Alexis Theony Valcana and Elias Kouvelas for their efforts in organizing this meeting and for their successful integration of science and culture for the participants This volume provides a comprehensive overview of the information presented at this conference including in depth discussions of each topic by the participants The chapters are grouped into five general categories which correspond to the subject areas covered during the meeting These include Gene and Phenotypic Expression Growth Factors and Oncogenes Cytoskeletal and Extracellular Molecules Neurotransmitters and Hormones and Molecular Aspects of Aging and Alzheimer s Disease The section on Gene and Phenotypic Expression includes discussions of transient gene expression in the nervous system Herschman developmental regulation of myelin associated genes Gordon et al
